I am disappointed that the summer spill reduction proposal has been reduced from the original proposal -- which I believe was not as aggressive as warranted. While I support any level of summer spill reduction, this amended proposal does not go far enough in reducing the waste of electric ratepayer money. The cost, per impacted ESA salmon, is not justified. Please further reduce the amount of water spilled in order to capture more of the estimated \$70 (plus) million annual saving (revenue enhancements). John Gerstenberger, Manager Hood River Electric Co-op
