## memorandum

**Bonneville Power Administration** 

DATE: April 26, 2004

KEP-4 ATTN OF:

Supplement Analysis for the Transmission System Vegetation Management Program FEIS SUBJECT:

(DOE/EIS-0285/SA-211-McNary-Ross {mile 138-144}) **Project No. V-R-04/10** 

To: Elizabeth Johnson

Natural Resource Specialist – TFR/The Dalles

**Proposed Action:** Vegetation Management for the McNary-Ross 345 kV transmission line corridor between tower structures 138/6 and 144/1.

**Location:** Project location is in the BPA Redmond Region in Skamania County, Washington.

**Proposed by:** Bonneville Power Administration (BPA)

**Description of the Proposal:** BPA proposes to clear unwanted vegetation from the rights of way and access roads along the McNary-Ross transmission line corridor.

**Analysis:** A checklist (see attached) was completed for this project in accordance with the requirements identified in the Bonneville Power Administrations Transmission System Vegetation Management Program FEIS (DOE/EIS-0285). The checklist evaluated the following areas:

- Description of right-of-way and vegetation management needed
- Vegetation to be controlled
- Surrounding land use and landowners
- Natural Resources
- Vegetation control methods
- Debris disposal
- Monitoring
- Appropriate environmental documentation

In preparation of this Supplement Analysis, the checklists were reviewed. Specific information regarding the areas as identified above is described in the attached checklists.

**Findings:** This Supplement Analysis finds that 1) the proposed actions are substantially consistent with the Transmission System Vegetation Management Program FEIS (DOE/EIS-0285) and ROD, and; 2) there are no new circumstances or information relevant to environmental concerns and bearing on the proposed actions or their impacts. Therefore, no further NEPA documentation is required.
