Department of Energy
Bonneville Power Administration

memorandum

DATE: April 26, 2002

REPLY TO
ATTN OF: KEP-4

SUBJECT: Supplement Analysis for the Transmission System Vegetation Management Program FEIS
(DOE/EIS-0285/SA-64)

TO: Truman Conn – TFP
Regional Manager, Walla Walla Region

Proposed Action: Vegetation Management for Substations and Non-Electric Facilities in the Walla Walla Region *(See Attachment A for a complete list of facilities)*

Proposed by: Bonneville Power Administration (BPA).

Description of the Proposal: BPA proposes to manage vegetation inside and around electrical substations and associated facilities. Vegetation management within the substation shall include the bare ground management of all graveled areas. These areas shall primarily be maintained with the use of herbicides. The management of vegetation outside the substation and associated facilities shall include: 1) bare ground management of perimeter roads and parking areas; 2) mechanical and/or spot herbicidal control of some broadleaves and noxious weeds; 3) mowing, fertilizing, and broadleaf control of landscaped lawn areas; 4) weed control in ornamental shrub areas; and 4) areas requiring only mechanical control to manage unwanted/danger trees, grasses, and shrubs.

Analysis: Please see the attached booklets. Each booklet contains detailed checklists, drawings, aerial photographs, and topographic maps for the resources present and the mitigation measures to be applied.

Findings: This Supplement Analysis finds that 1) the proposed actions are substantially consistent with the Transmission System Vegetation Management Program FEIS (DOE/EIS-0285) and ROD, and; 2) there are no new circumstances or information relevant to environmental concerns and bearing on the proposed actions or their impacts. Therefore, no further NEPA documentation is required.
