SPECIAL CONSIDERATIONS:

This position requires the selectee to undergo a pre-employment check and a full background investigation. Any offer made is considered a tentative job offer pending the outcome of the pre-employment check. Retention in the position is based upon a favorable adjudication of the background investigation. The incumbent will be subject to periodic reinvestigations.

Major Duties:

This position is located in the USDA, ARS, Foreign Disease Weed Science Research Unit, Frederick (Ft. Detrick), Maryland. The purpose of this position is to provide professional support to a Research Molecular Biologist, investigating and improving novel methods for detection, identification and characterization of new and emerging plant pathogenic fungi of significant threat to U.S. agriculture. The incumbent will be required to obtain a Limited Background Investigation (LBI) to work in BSL3 Containment Areas. Specific duties will include the following:

Responsible for planning, selecting appropriate methods and procedures, carrying out assignments, and reporting results specifically aimed at applying and testing molecular techniques and methods as a means to rapidly identify and characterize new and emerging fungal pathogens of U.S. crops.

Analyzes projects needs and experimental requirements and objective to determine specific plans, methods and techniques, determine data collection needs and assess results of work performed in terms of expectations. Develops and modifies methods as needed.

Interprets results of studies conducted, validates methods and data.

Reports results of work performed by preparing reports, tables and figures for inclusion in manuscripts and making oral presentations in workshops and before groups of scientists.

Working Conditions and Other Considerations:

Work is performed in greenhouses with temperatures up to 38 degrees C, BSL3 disease containment areas requiring personnel to shower prior to leaving area and laboratories where exposure to irritant or toxic chemicals are encountered and safety precautions, including wearing protective clothing, are required.

Qualifications Required: Your education and experience will be evaluated against all qualification requirements (basic and any additional requirements) listed below.

Basic Requirements

- A. Degree: biological sciences, agriculture, natural resource management, chemistry, or related disciplines appropriate to the position (e.g., plant pathology); or
- B. Combination of education and experience---Courses equivalent to a major, as shown in "A" above, plus appropriate experience or additional education.

This position has a positive education requirement. You must provide a copy of your academic transcripts OR a list of college courses with credit hours, dates completed, and grades received to verify education when applying for this position. If this information is not provided, your education may not be appropriately evaluated, and you may lose consideration for this position.

If you are selected for this position, you will have to provide an official copy of your transcripts prior to entering on duty.

Additional Requirements:

Education:

Applicant must have 2 years of progressively higher level graduate education leading to a master's degree or master's or equivalent graduate degree; or

Experience:

Applicant must have 1 year of specialized experience to perform successfully the duties of the position, and that is typically in or related to the work of the position. To be creditable, specialized experience must have been equivalent to at least the next lower grade level in the normal line of progression for the occupation. (See specialized experience below.)

Time-In-Grade Restrictions apply for all candidates considered under Merit Promotion/Alternative Merit Promotion.

Specialized Experience - experience which has equipped you with the following Knowledge, Skills and Abilities - 'KSAs' required to perform the duties of this position:

1. Knowledge of the principles, theories, and methods of biological sciences related to developing molecular methods to identify and characterize fungi.
2. Knowledge of biochemistry, molecular genetics, plant pathology, and/or microbiology.
3. Skill in using computers and equipment for molecular genetic analysis, including electrophoresis, thermocyclers for PCR and DNA sequencers.
4. Skill in using common techniques of molecular analysis, involving polymerase chain reaction, hybridization analysis of DNA, molecular cloning, and DNA sequencing.

Selective Placement Factor(s) - In order to be considered minimally qualified, you must also possess the following:

1. Ability to detect, identify, and characterize exotic fungal plant pathogens.

Other Important Information

Benefits Package:

A Benefits Package is not authorized for this position. Additional information about Federal benefits can be obtained at www.usajobs.opm.gov/ei61.htm.
