

# Proposed Rules

Federal Register

Vol. 64, No. 48

Friday, March 12, 1999

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF THE INTERIOR

### Minerals Management Service

#### 30 CFR Part 206

RIN 1010-AC09

#### Reopening Public Comment Period and Establishing Workshops on Proposed Rule—Establishing Oil Value for Royalty Due on Federal Leases

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Notice of reopening of public comment period and notice of workshops.

**SUMMARY:** The Minerals Management Service (MMS) is reopening the public comment period on a further supplementary proposed rule amending the royalty valuation regulations for crude oil produced from Federal leases.

During the comment period, MMS will hold three workshops. The primary purpose of these workshops is to receive new comments not previously submitted in this rulemaking record. MMS also seeks written comments focusing on new comments.

We are particularly interested in ideas that would help move the rulemaking process forward while still ensuring that the public receives fair value for its resources. There is no need to resubmit previously submitted comments since comments on previous proposals already are included in the rulemaking record.

Interested parties are invited to attend and participate in these workshops. MMS would welcome written comments submitted prior to the workshops to help identify the most important issues for discussion.

**DATES:** Comments must be submitted on or before April 12, 1999. The workshops will be held as follows:

Workshop 1—Houston, Texas, on March 24, 1999, beginning at 9 a.m. and ending at 5 p.m., Central time  
Workshop 2—Albuquerque, New Mexico, on March 25, 1999, beginning

at 9 a.m. and ending at 5 p.m., Mountain time  
Workshop 3—Washington, D.C., on April 6, 1999, beginning at 9 a.m. and ending at 5 p.m., Eastern time

**ADDRESSES:** Workshop 1 will be held at the Houston Compliance Division Office, Minerals Management Service, 4141 North Sam Houston Parkway East, Houston, Texas 77032. Phone: (281) 987-6802.

Workshop 2 will be held at the Bureau of Land Management District Office, 435 Montano Road, NE, Albuquerque, New Mexico 87107. Phone: (505) 761-8700.

Workshop 3 will be held at the Main Interior Building, 1849 C Street, NW, Washington, D.C. 20240 (large buffet room adjacent to the cafeteria in the basement). Phone: (202) 208-3512.

**FOR FURTHER INFORMATION CONTACT:** David S. Guzy, Chief, Rules and Publications Staff, Minerals Management Service, Royalty Management Program, P.O. Box 25165, MS 3021, Denver, Colorado 80225-0165, telephone (303) 231-3432, fax number (303) 231-3385, e-Mail David\_Guzy@smtp.mms.gov.

**SUPPLEMENTARY INFORMATION:** MMS published an advance notice of its intent to amend the current Federal oil valuation regulations in 30 CFR parts 202 and 206 on December 20, 1995 (60 FR 65610). The purpose of that notice was to solicit comments on new methodologies to establish the royalty value of Federal (and Indian) crude oil production in view of the changes in the domestic petroleum market, particularly the market's move away from posted prices as an indicator of market value.

Based on comments received on the advance notice, together with information gained from a number of presentations by experts in the oil marketing business, MMS published its initial notice of proposed rulemaking on January 24, 1997 (62 FR 3742), applicable to Federal leases only. MMS held public meetings in Lakewood, Colorado, and Houston, Texas, to hear comments on the proposal.

In response to the variety of comments received on the initial proposal, MMS published a supplementary proposed rule on July 3, 1997 (62 FR 36030). This proposal expanded the eligibility requirements for valuing oil disposed of under arm's-length transactions.

Because of the substantial comments received on both proposals, MMS reopened the rulemaking to public comment on September 22, 1997 (62 FR 49460). MMS specifically requested comments on five valuation alternatives arising from the public comments. MMS held seven public workshops to discuss valuation alternatives.

As a result of comments received on the proposed alternatives and comments made at the public workshops, MMS published a second supplementary proposed rule on February 6, 1998 (63 FR 6113). The comment period for this second supplementary proposed rule was to close on March 23, 1998, but was extended to April 7, 1998 (63 FR 14057). MMS held five public workshops (63 FR 6887) on this second supplementary proposed rule: in Houston, Texas, on February 18, 1998; Washington, D.C., on February 25, 1998; Lakewood, Colorado, on March 2, 1998; Bakersfield, California, on March 11, 1998; and Casper, Wyoming, on March 12, 1998.

By **Federal Register** notice dated July 8, 1998 (63 FR 36868), MMS reopened the comment period for the February 6, 1998, second supplementary proposed rule from July 9, 1998, until July 24, 1998, to receive further comment on the proposed rule. Meetings involving MMS, industry representatives, and Members of Congress were held in Washington, D.C., on July 9 and July 22, 1998. Another meeting involving Members of Congress and various other interested groups was held in Washington, D.C., on July 21, 1998. By **Federal Register** notice dated July 27, 1998 (63 FR 40073), MMS extended the comment period until July 31, 1998.

On August 31, 1998, the Assistant Secretary, Land and Minerals Management, sent to Members of Congress a letter outlining the direction the Department of the Interior might take on the major issues in the final rulemaking. This letter can be accessed at <http://www.rmp.mms.gov/library/readroom/pubcomm/FCCont.htm>. A copy of the letter also is attached as an appendix to the notice, and MMS would like comments on the matters addressed in the letter that relate to the proposed rule.

MMS is reopening the comment period on the second supplementary proposed rule in response to many requests from Members of Congress and other parties interested in moving the

process forward to publish a final rule. MMS is seeking new, not-previously-considered ideas that will help move the process forward while still ensuring that the public receives fair value for production of its resources. MMS would prefer written comments submitted prior to the workshops to help identify the most important issues for discussion. Commenters will be able to supplement these written comments, if necessary, after the workshops.

It is not necessary to resubmit comments already provided. MMS will consider comments submitted during previous comment periods as well as comments submitted during this new comment period when it prepares a final rule.

The workshops will be open to the public without advance registration. Public attendance may be limited to the space available. We encourage a workshop atmosphere; members of the public are encouraged to participate in a discussion of the alternatives. For building security measures, each person may be required to present a picture identification to gain entry to the meetings.

Dated: March 9, 1999.

**Harold Corley,**

*Acting Associate Director for Royalty Management.*

**United States Department of the Interior**

August 31, 1998.

Honorable John Breaux,  
*United States Senate,*  
Washington, DC 20510

Dear Senator Breaux: In accordance with the commitment contained in my August 11, 1998, letter to you, enclosed is an outline of the direction the Department of the Interior plans to take on the major issues in the final Federal oil valuation rule. The purpose of this outline is to advise you of the progress on the final rule. An identical letter has been sent to Senators Hutchison, Murkowski, Nickles, and Domenici.

After thoroughly reviewing and considering all of the comments received on the several proposed rules, including the July 16, 1998, further supplementary proposed rule, we are in the process of developing a final rulemaking consistent with the enclosed outline. I believe that you will see that we intend to make changes in response to comments from the oil and gas industry and other commenters while at the same time assure that we achieve fair market value for the public's mineral resources. This outline reflects our current state of decisions, but there may be changes as the final rule proceeds through the review process in the Department and at the Office of Management and Budget.

Recognizing that each company has individual marketing circumstances and accounting capabilities, in the final rule, we would allow companies a number of options. For example, if the lessee sells its oil at arm's

length after one or more arm's-length exchanges, we would allow the lessee the option of either tracing the production to the arm's length sale after the exchanges or paying on an index price. For the Rocky Mountain Region, lessees would use a series of benchmarks instead of the index price if they choose not to trace the production to the arm's-length sale. We would offer the same option if the lessee sells or transfers its oil to an affiliate that resells the oil under an arm's length contract. Further, the final rule would provide that the Assistant Secretary for Land and Mineral's Management or his/her delegate may issue binding valuation determinations.

I again call upon you and your colleagues to remove the rider, currently in the Interior Appropriations Bill, that would prohibit finalizing the rule for another year. As I indicated in my earlier letter, we have worked very hard over the past 3 years to accommodate the interests of all affected stakeholders in this rulemaking. We believe that we have developed the very best rulemaking possible, recognizing that the industry that pays the royalties and the Federal Government and States that receives the royalties, are simply never going to agree on certain issues. Delaying the rule for a year will not resolve these differences but rather assure continued disputes over the existing regulations and the loss of millions of dollars to Federal and State treasuries because such regulations are outdated.

As you may know, the comment period on the rulemaking is closed. Therefore, we are not accepting any comments in response to the decision reflected in the enclosed outline.

Thank you again for your continued involvement in this issue.

Sincerely,  
Bob Armstrong,

*Assistant Secretary, Land and Minerals Management*

Enclosure:

### **Outline for Federal Oil Valuation Final Rulemaking**

**Note:** The following outline reflects the direction in which the Minerals Management Service (MMS) and the Department of the Interior (Department) are headed in developing a final oil rule after reviewing all of the comments received on the several proposed rulemakings, including the July 16, 1998, further supplementary proposed rulemaking. The decisions reflected in this outline are subject to modification when the draft final rule proceeds through review in the Department and the Office of Management and Budget. Because the comment period on the rulemaking is closed, we are not accepting any comments in response to the decisions reflected in this outline.

#### *Definitions*

##### **Affiliate**

We would define the term "affiliate" separately from the term "arm's length," as suggested by many commenters. The term "affiliate" will use the same criteria for determining control as the

existing regulations (less than 10 percent ownership representing non-control, 10–50 percent representing a presumption of control, and greater than 50 percent representing control). Following publication of the final rule, MMS intends to develop specific guidelines for lessees to follow when attempting to rebut the presumption of control when ownership is between 10 and 50 percent.

##### **Gross Proceeds**

We would maintain the definition of the term "gross proceeds" proposed in the February 6, 1998, second supplementary proposed rule. That is, the term "gross proceeds" would include payments for marketing services which the lessee must perform at no cost to the Federal Government and for payments made to reduce or buy down the purchase price of oil to be produced in later periods.

##### *Valuation of Oil Sold by the Lessee at Arm's Length*

We would provide that value is the gross proceeds received by the lessees under an arm's-length sales contract with three exceptions, the first two of which are contained in the existing regulations:

1. The sales contract does not reflect total consideration actually transferred either directly or indirectly from the buyer to the seller.
2. The value is not reasonable due to either:
  - a. Misconduct by or between the parties to the arm's-length contract; or
  - b. Breach of the lessee's duty to market the oil for the mutual benefit of the lessee and the lessor. In response to comments received from industry and others about the revised language in the July 16, 1998, proposal being ambiguous, in the final rule MMS is moving in the direction of not including the July 16 language in the rule, but stating in the preamble that MMS will not second-guess a company's marketing decisions.
3. The oil is disposed of under a non-competitive call that is exercise by the purchaser.

If any one of these exceptions applies, then the lessee must value its oil based on the method used to value oil not sold at arm's-length (Alaska North Slope (ANS) spot price in California and Alaska, benchmarks in the Rocky Mountains, and applicable spot prices for the rest of the country).

*Valuation of Oil Sold After Arm's-length Exchange Agreements or Sold by an Affiliate at Arm's Length*

If the lessee sells its oil at arm's length after one or more arm's-length exchanges, we would allow the lessee the option of valuing its production on either the sale after the exchange(s) or index prices. For the Rocky Mountain Region, lessees would use a series of benchmarks instead of index prices if they choose not to trace the production to the arm's-length sale.

Similarly, if the lessee sells or transfers its oil to an affiliate that resells the oil under an arm's-length contract, we would allow the lessee the option of valuing the production on either the gross proceeds received by the affiliate under the arm's-length resale contract, subject to the above stated exceptions for oil sold by the lessee at arm's length, or index prices. Again, for the Rocky Mountain Region, a series of prescribed benchmarks would be used instead of index prices.

The lessee could make separate elections for oil that it exchanges at arm's length and oil that it transfers to an affiliate that resells the oil. However, each of these elections must be for a 2-year period, and the lessee would value all oil in each of these categories in the same manner.

*Valuation of Oil Not Sold at Arm's Length*

*For California and Alaska:* ANS spot price less a location/quality differential would apply.

*For the Rocky Mountain Region:* (Utah, Colorado, Wyoming, Montana, North Dakota, and *South Dakota*): The first applicable of the following benchmarks would apply:

1. The highest bid under an MMS-approved tendering program in which the lessee:

a. Offers and sells at least 30 percent of its production from both Federal and non-Federal leases in the area, and

b. Receives at least three bids for the tendered volumes from bidders who do not have their own tendering programs that cover some or all of the same area.

2. The volume-weighted average of the lessee's and its affiliate's arm's-length contract prices for the purchase or sale of oil from the field or area. The total volume purchased or sold under those contracts must exceed 50 percent of the lessee's and its affiliate's production from both Federal and non-Federal leases in the same field or area.

3. The spot price for West Texas Intermediate crude at Cushing, Oklahoma, adjusted for location and quality.

4. If all of the first three benchmarks result in an unreasonable value, the MMS Director could establish an alternative valuation method.

*For the OCS and Mid-Continent (other than California, Alaska, and the six-State Rocky Mountain Region):* A market center spot price less a location/quality differential from the market center to the lease would apply.

*Location/Quality Adjustments to Index Prices*

If the lessee used index pricing to value its production, it would adjust the index price for location/quality differentials using:

1. A location/quality differential contained in the lessee's own arm's-length exchange agreement, or

2. An MMS-calculated location/quality differential. MMS would publish annually a series of differentials based on data MMS would collect on Form MMS-4415.

The lessee could also claim a transportation allowance when valuing oil based on either index or arm's-length gross proceeds as discussed below. Quality bank adjustments based on applicable pipeline quality bank specifications could also be taken if they did not duplicate the differentials above.

*Transportation Allowances*

*Arm's-length transportation contracts*

If the lessee or its affiliate transports its oil under an arm's-length transportation contract, the lessee could claim a transportation allowance for the actual costs incurred under that contract.

*Non-arm's-length transportation contracts*

If the lessee or its affiliate transports its oil under a non-arm's-length transportation contract, the lessee could claim a transportation allowance based on its reasonable, actual costs including operating and maintenance expenses, overhead, depreciation, and a return on investment using a rate of return equal to the industrial bond yield index for Standard and Poor's BBB rating. We would not allow Federal Energy Regulatory Commission tariffs as an exception to computing actual costs.

*Subsea Gathering*

We would include language in the preamble stating that MMS will review movement of bulk production from subsea completions to a platform on the ocean surface on a case-by-case basis to determine whether it is gathering or qualifies as transportation. Recognizing that this issue is primarily a gas issue,

MMS intends to resolve it by issuing separate regulations or policy guidance.

*Non-Binding Valuation Guidance*

We would provide that the Assistant Secretary for Land and Minerals Management or his/her delegate may issue binding valuation determinations. [FR Doc. 99-6147 Filed 3-11-99; 8:45 am]

BILLING CODE 4310-MR-P

**DEPARTMENT OF THE INTERIOR**

**Office of Surface Mining Reclamation and Enforcement**

**30 CFR part 938**

[PA-124-FOR]

**Pennsylvania Regulatory Program**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

**ACTION:** Proposed rule; public comment period and opportunity for public hearing.

**SUMMARY:** OSM is announcing the receipt of a proposed amendment to the Pennsylvania Regulatory Program (hereinafter referred to as the Pennsylvania Program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended. Pennsylvania has submitted this proposed amendment to reflect changes made to the Pennsylvania Surface Mining Conservation and Reclamation Act (PASMCRRA) by Acts 173 and 43. The proposed amendment also contains regulations added, amended or deleted in responses to these changes. This proposal modifies some requirements and adds other requirements dealing with reining and reclamation, postmining discharges, and water supply protection/replacement.

**DATES:** Written comments must be received by 4:00 p.m., E.D.T. April 12, 1999. If requested, a public hearing on the proposed amendment will be held on April 6, 1999. Requests to speak at the hearing must be received by 4:00 p.m., E.D.T., on March 29, 1999.

**ADDRESSES:** Written comment and requests to testify at the hearing should be mailed or hand-delivered to Mr. Robert J. Biggi, Director, Harrisburg Field Office at the first address listed below.

Copies of the Pennsylvania program, the proposed amendment, a listing of any scheduled public meetings or hearing, and all written comments received in response to this notice will be available for public review at the address listed below during normal
