

Letter From the Chairman

The third quarter of 2002 was a period of solid financial performance for TVA and a time of significant achievements in supporting the National Energy Policy.

TVA reported a net income of \$59 million for the third quarter, an increase of \$84 million from the same period last year. Although revenues for the year-to-date are below those of last year, due largely to the effects of the abnormally mild winter, hot temperatures during the quarter bolstered energy sales by 4.7 percent compared to the same period last year.

To meet the Valley's future power needs while minimizing impacts on air quality, the Board decided to return the Browns Ferry Nuclear Plant Unit 1 to service. The return of Unit 1 will augment our ability to provide affordable, reliable power to the people of the Tennessee Valley and is consistent with the National Energy Policy.

In fulfilling our vital role as public power provider, TVA makes important contributions to the good of the Valley. TVA and three other major transmission providers in the Southeast and Midwest agreed to work together to try to develop broad, seamless transmission service across a major portion of the power grid in the eastern United States. This regional approach supports nationwide efforts to help ensure uniform access, equitable market rules, and quality transmission service.

To promote the development and deployment of new energy technologies that will benefit the nation and improve quality of life, TVA joined in partnership with Oak Ridge National Laboratory, the Department of Energy, and Habitat for Humanity to build "Net Zero Energy" homes. These energy-efficient residences will produce as much power as they consume, contributing to a cleaner, more secure energy future for homeowners.

TVA is using sound business practices coupled with 21st century technologies to deliver affordable, reliable electric power, a cleaner environment, and a vibrant economy for the people of the Tennessee Valley. Through excellence in business performance and public service, the 13,000 men and women of TVA are generating more for less, for the good of many.

Jenn L. Mullough &

Glenn L. McCullough, Jr. Chairman

Management's Discussion and Analysis

TVA had net income of \$59 million for the third quarter of 2002, compared with a \$25 million loss for the same period last year. For the year-to-date, TVA's net income before loss on project cancellation amounted to \$123 million. The \$27 million net loss for the year is primarily due to a construction project cancellation (see Other Matters, below).

Operating Revenues

Operating revenues for the third quarter were \$1,678 million, compared with \$1,627 million for the same period last year. Fiscal year-to-date operating revenues were \$4,852 million, compared with \$5,100 million for the same period last year. The \$51 million increase for the quarter was primarily due to warmer weather this year with 12 percent more cooling degree days than last year. The significant decline in revenues for year-to-date of \$248 million is the result of extremely milder weather experienced during the first six months of fiscal year 2002 with over 18 percent fewer heating degree days than last year.

Operating Expenses

Operating expenses through the third quarter of 2002 were \$3,667 million, compared with \$3,957 million for last year. Fuel and purchased power expense decreased \$83 million as a result of lower generation. Additionally, depreciation and amortization expenses declined \$396 million, primarily due to accelerated amortization of regulatory assets in 2001 to offset an increase in Other Income (see below). Operating and maintenance expense increased \$178 million, primarily as a result of increased outage and project activities, an increase in workers' compensation expense, and lower yield on pension assets.

Other Income

Other income in the prior year includes the receipt of an amount in excess of \$200 million under settlement of litigation involving a power purchase contract in 2001.

Interest Expense

Net interest expense declined \$43 million and \$168 million for the three months and nine months ended June 30, 2002, respectively, as compared with the same periods of 2001. These reductions reflect a lower average interest rate of 6 percent for 2002 as compared with 6.75 percent for 2001 and a lower level of total outstanding debt during fiscal year 2002.

Other Matters

Due to changes in the three- to five-year forecast of energy supply and market opportunities, TVA elected not to complete a gas-fired combined-cycle plant that would have provided 510 megawatts of power in 2004. Accumulated costs, net of estimated salvage, associated with the project total approximately \$150 million, which TVA recognized in the second quarter as a loss on project cancellation.

On May 16, 2002, the TVA Board of Directors authorized TVA Nuclear to take steps to recover and restart Browns Ferry Nuclear Plant Unit 1 in order to meet long-term power requirements. The Board also approved seeking license extensions to operate all three Browns Ferry Units an additional 20 years past the current expiration date of the licenses. The Unit 1 recovery project is expected to add approximately 1,280 megawatts of generation at a cost of \$1.7 billion to \$1.8 billion and take five years to complete.
