B. INSTRUCTIONS FOR CALCULATING WITHHOLDING AMOUNTS

In October of each year, the RRB sends to each National Reporting Officer or National Secretary-Treasurer, notices of the earnings maximums and the Tier I, Tier II, and Medicare tax rates for the following year.

Enter the annual compensation maximums in the corresponding boxes on the OE-1a. Compensation should not be taxed or reported in excess of the annual compensation maximums.

Tier I taxes are not assessed on earnings above the Tier I annual maximum limit and Tier II taxes are not assessed on earnings above the Tier II annual maximum limit. There is no compensation maximum for Medicare tax.

The employee pays three payroll taxes, Tier I, Tier II, and Medicare tax. The employee and employer tax rates are the same for Tier I and Medicare, but are different for Tier II. To calculate withholding, multiply the taxable earnings by:

- 1. The employee Tier I tax rate to obtain the Tier I tax;
- 2. The employee Tier II tax rate to obtain the Tier II tax; and
- 3. The Medicare tax rate to obtain the Medicare tax.

Following is the calculation of Carl Carman's withholding from Section A.

MEDICARE	TIER I	TIER II
TAX	TAX	TAX
WITHHOLDING	WITHHOLDING	WITHHOLDING
\$ 50.00	\$ 50.00	\$ 50.00
<u>x. 0145</u>	x .062	x .049
\$ 0.73	\$ 3.10	\$ 2.45

C. INSTRUCTIONS FOR USE OF FORM OE-1a IN COMPLETING FORM CT-1

Form CT-1 is the IRS form used to report railroad retirement taxes. Form CT-1 is filed annually for taxes imposed on earnings paid in a calendar year. If all employees' cumulative earnings are less than the Tier II maximum, the cumulative gross earnings will also be the cumulative Tier I and cumulative Tier II earnings.

Enter the cumulative earnings totals and withholding totals in the appropriate spaces in the *TAX CALCULATION WORKSHEET* on the back of Form OE-1a. The cumulative totals are the sums of the totals from all Forms OE-1a filed in the year. Enter the tax rates in Items A, B, and C on the worksheet and multiply by the earnings. The items from the *TAX CALCULATION WORKSHEET* are in the same order and directly correspond to items on Form CT-1. Transcribe the amounts from the worksheet to Form CT-1 using the "CT-1 references" column on the worksheet as a guide.

The cumulative yearly totals in the following example are four times the quarterly totals from **Section A**.

F. Column 12 Total	\$ 372.28	Tier II Employee Tax
G. Sum columns A through F CT-1 Railroad Retirement Tax Liability for period.	\$ 2,719.39	Total Railroad Retirement Taxes

The amounts in Item A should equal Item D and amounts in Item B should equal Item E. The items may differ a few cents due to rounding of partial cents.

D. INSTRUCTIONS FOR USE OF FORM OE-1a IN DETERMINING TAX LIABILITY

CT-1 taxes are paid monthly with two exceptions, 1) your tax liability is more than \$50,000, in which case taxes are paid more often than monthly, or 2) your tax liability is less than \$2,500, in which case taxes may be paid annually. Deposits are made with a Federal Reserve Bank using Form 8109, Federal Tax Deposit Coupon or electronically using RRBLINK. Contact the IRS for Form 8109 and deposit information.

The frequency, monthly or quarterly, for filing Form OE-1a is determined by your national organization. If you file Form OE-1a monthly, the form can be used to calculate your monthly tax liability by completing Items A through G on the *TAX CALCULATION WORKSHEET* that is on the back of Form OE-1a. If you file Form OE-1a quarterly, the form will not have the monthly totals needed to determine monthly tax liability. If you develop the monthly earnings and withholding totals, you can enter the monthly totals in the *TAX CALCULATION WORKSHEET* to calculate the monthly tax liability.

If all employees' earnings are less than the Tier II maximum, another option for determining monthly tax liability is to multiply the monthly gross earnings by the combined tax rate. The combined tax rate is the sum of the six tax rates: Employee and Employer-Medicare rates, Tier I rates, and Tier II rates. For example, the sum of the six tax rates for 2002 is 35.8%. Multiply the monthly 2002 gross earnings by .358 to obtain the monthly 2002 CT-1 tax liability. However, the tax rates are subject to change annually. (See Section B of these instructions).

The following example demonstrates the calculation of CT-1 tax liability for March 2002 using data from **Section A.** The totals in Items A through G were developed from the figures shown for the third month of the first quarter.
