Research and

Administration

TRAINING...IT'S THE LAW!

Title 49, Code of Federal Regulations, Part 172, Subpart H, mandates training for individuals involved in the transportation of hazardous materials (hazmat). New hazmat employees must be trained within 90 days after employment. Recurrent training of all hazmat employees is required at least once every three years.

TRANSPORTATION SAFETY INSTITUTE

The U.S. DOT Research and Special Programs Administration's Transportation Safety Institute offers the following courses designed to train individuals in skills necessary to transport hazardous materials in conformance with federal and international regulations. Basic and specialized courses are offered and include all training materials.

- General Awareness for Hazardous Materials Emergency Responders (2 Days) This course is designed to equip emergency responders with a general awareness of how to recognize and deal with hazardous materials and the dangers associated with them during transportation.
- Cargo Tank Regulatory Compliance (5 Days) The instruction in this course is directed to those 49 CFR regulations that relate to shippers and carriers of hazmat by cargo tank.
- Transportation of Hazardous Materials (5 Days) This multimodal course provides a basic working knowledge of the hazmat regulations contained in 49 CFR.
- Air Transportation of Hazardous Materials (3 Days) This course concentrates on the requirements and standards of ICAO/IATA and applicable parts of 49 CFR. (An optional 4th day emphasizing military airlift of hazmat is available through special arrangement.)
- International Maritime Dangerous Goods Code (IMDG Code) (3 Days) This training focuses on "how to use" the IMDG Code. Areas covered emphasize the domestic and international transportation of hazmat by vessel.
- Infectious Substances Transportation (2 Days) This course covers the requirements for shipping and transporting infectious substances, diagnostic specimens, biological products, regulated medical waste, and related exceptions. (A one-day course is available to on-site sponsors.)

NOTE: A working knowledge of the hazardous materials regulations is required to attend the following courses:

- Instructor Training: Hazmat Transportation Modules (3 Days) This "train-the-trainer" course is designed to improve instructor skills, enhance understanding of the hazmat regulations, and give students a modular training program to use when training others. A pretest is required.
- Transportation of Hazardous Materials (Recurrent) (3 Days) This is enhanced instruction to provide recurrent (refresher) training for hazardous materials employees.
- Cylinders Transportation (3 Days) This training focuses on the requirements for offering, transporting, testing, qualifying, maintaining, and using gas cylinders as required by 49 CFR.
- Explosives Transportation (3 Days) This training course covers the shipping and carriage of explosives in accordance with 49 CFR.
- Performance-Oriented Packaging (POP) (3 Days) This course concentrates on the manufacturing, testing, marking, and use of UN/POP packaging in accordance with 49 CFR.
- Radioactive Materials (RAM) Transportation (3 Days) This course focuses on preparing and transporting RAM shipments in accordance with 49 CFR. It includes inspection procedures using radiation-monitoring devices.
- Hazardous Wastes & Substances Transportation (3 Days) This instruction is directed towards the shipping and carriage of hazardous wastes and substances in accordance with 49 CFR and 40 CFR. (This is not a RCRA course.)
