\* **Legend:** Unit Type:AC=Acres, LF=Linear Feet, CY=Cubic Yard, GA=Gallon, EA=Each, MI=Mile, Hour=Hours; Cost Type: FR=Flat Rate, AM=Actual Cost-Not to Exceed a Specified Maximum; Average Unit Cost: Data derived from NRCS offices and various program sources.

\*\* **Maximum Cost Share** Rate is defined in EQIP Policy. For structural and vegetative practices, the cost share rate cannot exceed 50% of the practice cost except for "Limited Resource Farmers" (LRF) who may qualify for 90% cost share or "Beginning Farmers" who may qualify for 75%cost share. Flat Rate practices may not exceed 100% of the total practice cost. Approved local cost share rates may be lower than the state approved list.

\*\*\* **NTE:** The "Not to Exceed Limit" or Cap is the maximum amount of EQIP funds that be be reimbursed for any single practice or component. The NTE or maximum cap is calculated by multiplying the "Average Unit Cost" by the "Cost Share Rate".

Changes to this California EQIP State Approved Practice Cost Share List may only be approved by the NRCS State Conservationist.
