Final Notice of Sale, Lease Sale 190, Central Gulf of Mexico March 17, 2004

In the "Information To Lessees" document contained in the Final Notice of Sale 190 Package, the Gulf Landing LLC LNG Deepwater Port License application for West Cameron Area, Block 213 was inadvertently omitted from paragraph (o). Paragraph (o) is replaced in its entirety with the following:

“(o) Deepwater Port Applications for Offshore Liquefied Natural Gas Facilities. To date, the U.S. Coast Guard and the Maritime Administration have received three applications for the licensing of deepwater ports involving proposed liquefied natural gas (LNG) facilities. These proposed facilities would receive LNG ships, re-gasify the LNG offshore, and transport the natural gas to onshore markets through new pipelines that interconnect with existing pipeline systems. Two of these LNG projects have been approved by the Maritime Administration – Port Pelican, on Vermilion Area, Blocks 139 and 140 (currently unleased, but unavailable in Sale 190), and Energy Bridge on West Cameron Area, South Addition, Block 603 (currently leased by El Paso Production Company). The application for the third project, Gulf Landing on West Cameron, Block 213 (currently unleased), was deemed complete, and notice of its acceptance was published in the Federal Register at 69 FR 3165, on January 22, 2004.

Additional information regarding the proposed offshore LNG receiving and re-gasification facilities can be obtained at the following address:
