19	18	162 - 179	Α	Address Line 3				3	
20	12	180 - 191	Α	Blanks					
21	1	192	Α	Record Mark		May be blank			

Footnotes:

NOTE: Each data record record is preceded by a 4-byte field, and the first 4 bytes of each tape block contain the block length (standard IBM file format).

- 1 Object Code: 0 = Salary, 1 = Salary plus Travel, 2 = Cash Award
- 2 Zip Code: May be 5 numerics followed by 4 blanks, or 9 numerics. Do NOT insert hyphen between 5th and 6th digits. It wil be inserted by RFC prior to check printing.
- 3 Do NOT place Zip Code in last line of address. Zip Code should be entered in Zip Code field. RFC edit programs will properly "float" the zip code on the printed check.
