## HIGHLIGHTS OF JOHNSTOWN, PA NATIONAL COMPENSATION SURVEY JULY 2003

Workers in the Johnstown metropolitan area averaged $\$ 15.45$ per hour during July 2003, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Sheila Watkins reported that white-collar workers averaged $\$ 19.50$ per hour and accounted for 50 percent of the workers in the area. Blue-collar employees averaged $\$ 12.16$ per hour and represented 25 percent of the workforce, while the remainder worked in service occupations and earned $\$ 10.41$ per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 119 firms representing 34,000 workers in the Johnstown, PA, metropolitan area, which includes Cambria and Somerset Counties. Seventy percent of those represented worked in private industry.

In the Johnstown metropolitan area, average hourly wages were published for 25 detailed occupations. (See table 1.) Among white-collar workers, elementary school teachers averaged $\$ 36.51$ per hour; registered nurses, $\$ 22.40$; and secretaries, $\$ 12.69$. Blue-collar occupations included welders and cutters earning $\$ 13.17$ per hour, truck drivers at $\$ 10.73$, and stock handlers and baggers at $\$ 7.25$. In the service occupations, nursing aides, orderlies and attendants averaged $\$ 10.61$ per hour; janitors and cleaners, $\$ 8.54$; and cooks, $\$ 7.86$.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the Johnstown metropolitan area averaged $\$ 16.34$ per hour and part-timers earned $\$ 7.40$. Union workers in blue-collar jobs averaged $\$ 13.48$ per hour, while their nonunion counterparts made $\$ 10.93$. Private industry workers at establishments employing 50-99 workers averaged $\$ 10.54$ per hour and those in establishments with 500 or more employees earned $\$ 15.60$.

The NCS is part of a statistical program that has integrated three separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an occupation based on knowledge, skill, independent judgment, supervision received and other factors required on the job.

## Survey Availability

Complete survey results are contained in the Johnstown, PA National Compensation Survey July 2003 (Bulletin 3120-40). While supplies last, single copies of the bulletin are available from the Philadelphia Information Office by calling (215) 597-3282. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at http://www.bls.gov/ncs/home.htm. Select survey tables can also be obtained from the Bureau's fax-on-demand service in Philadelphia by dialing (215) 597-4153 and requesting documents 9780, 9781, 9782, 9783, and 9784.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the Philadelphia Information Office at (215) 597-3282 from 8:30 a.m. to 12:00 p.m. and 1:00 to 3:30 p.m. ET.

[^0]4 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means "not elsewhere classified." Overal occupational groups may include data for categories not shown separately.

[^1]4 Union workers are those whose wages are determined through collective bargaining.

5 Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

6 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.
2 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

3 Establishments classified with 50-99 workers may contain
establishments with fewer than 50 due to staff reductions between survey sampling and collection.

4 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

[^0]:    1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

    2 All workers include full-time and part-time workers.
    3 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

[^1]:    1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

    2 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

    3 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35 -hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40 -hour week is the minimum full-time schedule.
