

Table K.1. Personal Income and Per Capita Personal Income by Metropolitan Area, 1999-2001—Continued

Table with columns for Area name, Personal income (Millions of dollars, Percent change), and Per capita personal income (Dollars, Rank in U.S.). Rows list various Metropolitan Areas with their respective income and population data for 1999, 2000, and 2001.

1. Per capita personal income was computed using Census Bureau midyear population estimates. Estimates for 2000-2001 reflect county population estimates available as of April 2003.
2. Percent change calculated from unrounded data.
3. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from

the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.
4. Includes Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas (PMSAs designated by *), and New England County Metropolitan Areas (NECMAs). The New Haven-Bridgeport-Stamford-Danbury-Waterbury, CT NECMA is presented as a PMSA (part of the New York CMSA).
