NAVAL MEDICINE ONLINE

Strategic
Foundation

Vision

To contribute to every Naval Medicine decision.

Mission

We provide an adaptable, scaleable, and secure framework to represent, host, and integrate Naval Medicine business processes, create and share information, and develop tailored services that are cultivated by our customer's innovations, contributions, and continuous feedback.

Strategies

We will accomplish our goals and objectives by:

- Expeditiously developing information and business services by reusing existing and functional programming code, leverage on programming language variety, and adopt web services through a Service Oriented Architecture (SOA) approach.
- Thinking like a business to shape our thought processes as customer oriented profitable encounters, engage in advanced capacity planning, and ensuring we provide our new and current customers with an attractive, lasting, and beneficial value proposition.
- Providing "hassle-free" services that are independent of unnecessary user authentication and paradigms.

Core Values

We strive on individual decision making, risk taking, and forward thinking. Innovation is fostered by freedom of thought, creativity, and the sharing of ideas among our peers. We are passionate about who we are and how we have made Naval Medicine's new online presence a success. We cherish and respect our customer's diverse environments, cultures, and experiences; thus Naval Medicine Online is a direct reflection of our customers.
