SUPPLEMENTARY INFORMATION:

Title: Stripper Royalty Rate Reduction Notification.

OMB Control Number: 1010-0090.

Bureau Form Number: n/a.

Abstract: The Department of the Interior (DOI) is responsible for matters relevant to mineral resource development on Federal and Indian Lands and the Outer Continental Shelf (OCS). The Secretary of the Interior (Secretary) is responsible for managing the production of minerals from Federal and Indian Lands and the OCS, collecting royalties from lessees who produce minerals, and distributing the funds collected in accordance with applicable laws. The Secretary also has an Indian trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. We perform the royalty management functions and assist the Secretary in carrying out DOI's Indian trust responsibility.

The Bureau of Land Management (BLM) amended 43 CFR 3103.4-1 to allow royalty rate reductions to operators of low-producing, stripper oil properties. This amendment action encourages continued oil production, provides an incentive for enhanced oil recovery projects, discourages abandonment of oil properties producing less than 15 barrels of oil per

well-day, and reduces operators' expenses. Operators are required to notify MMS of the reduced royalty rate using Form MMS-4377, Stripper Royalty Rate Reduction Notification. The form requires identification of the operator, name of the contact person, lease and agreement numbers, calculated royalty rate, current royalty rate and period covered.

We estimate that an operator may require 30 minutes per property to research production for one 12-month period, determine average annual well production, and calculate and report a new royalty rate. This is an annual burden of 2,250 hours (½ hour × 4,500 properties). We estimate that an operator may require 15 minutes annually to perform the necessary recordkeeping responsibilities associated with this information collection, or an annual burden of 225 hours (¼ hour × 900 operators).

Responses to this information collection are voluntary and are required for respondents to claim a reduced royalty rate. Proprietary information is requested and protected, and there are no questions of sensitive nature involved in this collection of information.

Frequency: On occasion.

Estimated Number and Description of Respondents: 900 operators of low-producing, stripper oil properties.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: 2,475 hours.

Estimated Annual Reporting and Recordkeeping "Non-hour Cost" Burden: n/a.

Comments: Section 3506(c)(2)(A) of the Paperwork Reduction Act requires each agency "to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *." Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

The PRA also requires agencies to estimate the total annual reporting "non-hour cost" burden to respondents or recordkeepers resulting from the collection of information. We have not identified non-hour cost burdens and

need to know if there are costs associated with the collection of this information for either total capital and startup cost components or annual operation, maintenance, and purchase of service components. Your estimates should consider the costs to generate, maintain, and disclose or provide the information. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information; monitoring, sampling, drilling, and testing equipment; and record storage facilities.

Your estimates should not include equipment or services purchased: (i) Before October 1, 1995; (ii) to comply with requirements not associated with the information collection; (iii) for reasons other than to provide information or keep records for the Government; or (iv) as part of customary and usual business or private practices.

The Paperwork Reduction Act of 1995 provides that an agency shall not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

Dated: March 23, 2001.

Associate Director for Minerals Revenue Management.
