

Consumer Price Indexes, Sixteen Countries, 1950-2003

Table A. Annual Indexes: 1982-84 = 100

Table B. Average Annual Percent Change

SOURCE: These indexes and percent changes are based upon national consumer price indexes as published by each country. The data have not been adjusted for comparability. National differences exist, for example, with respect to population coverage, frequency of market basket weight changes, and treatment of homeowner costs.

BLS links published indexes together to form historical series and rebases the foreign indexes to the U.S. base 1982-84. The data in these tables are not available in this form from the foreign statistical agencies.

Prepared by: U.S. Department of Labor, Bureau of Labor Statistics,
Office of Productivity and Technology, June 3, 2004.

INTRODUCTORY NOTES

Table A: The indexes on the 1982-84 base are calculated by rebasing the official indexes of each country to the official U.S. base year. The index for Germany is shown on the official German base year (2000).

Table B: Percent change computed using compound rate method. The figures may differ from official percent changes published by national statistical agencies due to rounding. In the case of Sweden, the official percent changes are not calculated from the published index.

In the tables, column headings "I" and "II" refer to the reference populations as follows:

I All Households Index: Indexes pertain to all households in Australia (from September 1998; urban worker households prior to September 1998), Austria, Belgium, Canada (from January 1995; all urban households from September 1978 to December 1994; middle-income urban households prior to September 1978), Denmark, France (from 1991; urban worker households prior to 1991; worker households in Paris only prior to 1962), Germany, Italy, Norway (from 1960; urban worker households prior to 1960), and Sweden; all urban households in the United States (from 1978; urban worker households prior to 1978), the Netherlands, and Switzerland (from May 1993; urban worker households prior to May 1993); all households excluding agricultural and single-person households in Japan; and all households excluding pensioner and high-income households in the United Kingdom.

II Worker Households Index: Indexes pertain to middle-income households in Germany, Italy, and Spain. For the Netherlands, index pertains to employee households from 2001; low-income employee households prior to 2001.

ENDNOTES

Table A:

See column heading descriptions in introduction. (1) The indexes are calculated by rebasing the official indexes of each country to the official U.S. base year. Because of the rebasing to 1982-84, the indexes may differ from official indexes published by national statistical agencies. (2) Urban worker households prior to 1978. (3) All households from January 1995, all urban households from September 1978 to December 1994, and middle-income urban households prior to September 1978. (4) Urban worker households prior to September 1998. (5) Excluding rent and several other services prior to 1976. (6) Excluding rent prior to 1964. (7) All households from 1991, urban worker households prior to 1991, worker households in Paris only prior to 1962. (8) Data for years prior to 1991 for the former West Germany were last published in "Consumer Price Indexes, Sixteen Countries, 1950-2002," Bureau of Labor Statistics, April 29, 2003, and are available upon request. (9) Employee households from 2001, low-income employee households prior to 2001. (10) Urban worker households prior to 1960. (11) Urban worker households prior to May 1993.

Table B:

See column heading descriptions in introduction. (1) Percent change computed using compound rate method. The figures may differ from official percent changes published by the national statistical agencies due to rounding. In the case of Sweden, the official percent changes are not calculated from the published index. (2) Urban worker households prior to 1978. (3) All households from January 1995, all urban households from September 1978 to December 1994, and middle-income urban households prior to September 1978. (4) Urban worker households prior to September 1998. (5) Excluding rent and several other services prior to 1976. (6) Excluding rent prior to 1964. (7) All households from 1991, urban worker households prior to 1991, worker households in Paris only prior to 1962. (8) Data for years prior to 1991 for the former West Germany were last published in "Consumer Price Indexes, Sixteen Countries, 1950-2002," Bureau of Labor Statistics, April 29, 2003, and are available upon request. (9) Employee households from 2001, low-income employee households prior to 2001. (10) Urban worker households prior to 1960. (11) Urban worker households prior to May 1993.
