1. Per capita personal income was computed using Census Bureau midyear population estimates. Estimates for 1995-97 reflect county population estimates available as of March 1999. 2. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms. 3. Includes Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas (PMSA designated by \*), and New England County Metropolitan Areas (NECMA's). The New Haven-Bridgeport-Stamford-Danbury-Waterbury, CT NECMA is presented as a PMSA (part of the New York CMSA).
