(7) MSC Ships Allowance List Number Index
(8) Chartered, Prepositioning, FSS, LMSR and T-AH Ships Allowance List
(9) Special Mission Ships Allowance List
(10) Naval Fleet Auxiliary Force, Pacific Allowance List
(11) Naval Fleet Auxiliary Force, Atlantic Allowance List
(12) Ordering Methods

1. Purpose. To issue nautical chart and publication allowances for MSC commands and ships. This instruction is a complete revision and should be read in its entirety.

2. Cancellation. COMSCINST 3145.1B.

3. Scope

a. The nautical products required by this instruction support MSC worldwide. Requirements to support MSC Contingency Operations will be promulgated separately.

b. This instruction applies to all commands (including those not presently activated), and ships under MSC control. In addition, it applies to chartered ships engaged on other than normal operations (e.g., PREPO operations). MSC ships under operational control of other commanders (e.g., NFAF) may carry additional charts and publications as required.

15 August 2000

4. Definitions

a. Permanent Allowance. The minimum quantities of products a ship or command is required to hold at all times.

b. Deployment Allowance. The minimum quantities of products, in addition to its permanent allowance, a ship or command is required to hold when supporting a specified OPLAN or operation.

c. Individual Unit Allowance. Additional quantities of products, in addition to its permanent and deployment allowances, a command or ship is authorized to hold at all times.

d. Automatic Distribution (AD) Service. A system whereby the Defense Supply Center Richmond/Defense Distribution Mapping Activity (DSCR/DDMA) automatically provides new products, new editions of existing products and changes to existing publications as they are published. This service is provided for all products of a command's or ship's permanent, individual unit and deployment allowance when activated.

e. Crisis. Incidents or situations involving a threat from a source external to the U.S., its territories and possessions that rapidly develop and create a condition of such diplomatic, political or military importance to the U.S. Government that the commitment of U.S. Military Forces and/or resources is contemplated to achieve our national objectives.

f. Non-Crisis - Unprogrammed Support. This situation does not involve the possible commitment of U.S. Military Forces/resources. Examples of non-crisis situations requiring quick-response support are previously unscheduled exercises, short notice deployments, last minute deployments or last minute deployment changes.

5. General

a. Allowance Description. Enclosures (1) through (6) list the shore command permanent allowance requirements. Enclosure (7) provides the specific allowance list number, described in enclosures (8) through (11), for individual ships.

b. Additional Quantities. The allowances in enclosures (1) through (6) and (8) through (11) are minimum requirements. They are not intended to restrict the charts and publications a command, office or ship may hold. Commanders, Commanding Officers, Officers in Charge and Masters are encouraged to consult reference (a) and order additional products

they deem necessary to support mission accomplishment. Enclosure (12) provides a list of chart/publication ordering methods. Units should keep in mind, however, that AD is provided only for allowance products. A command or ship desiring to receive additional copies of certain products on AD should request the addition of these products to the individual unit allowance. The procedure for establishing and changing an individual unit allowance is described in paragraph 9.

c. Crisis Support Requirements. When publication and chart products above allowance holdings are required for sudden crisis-type situations, they should be requested via high priority requisition with telephone backup to Defense Supply Center, Richmond Product Center 9 (DSCR PC9). Such requests should be for the standard products shown in reference (a). Telephone coordination of requests will expedite DSCR response. The numbers are DSN 695-6500, COMM (804) 279-6500, fax DSN 695-6510, COMM 804-279-6500 during duty hours (Washington DC time) or Duty Officer Pager 1-804-717-3810, during non-duty hours.

d. Non-Crisis - Unprogrammed Support Requirements. When publication and chart products are required to satisfy an unanticipated requirement that needs a near-time response, they should be requested via high priority requisition with telephone backup to Defense Supply Center, Richmond Product Center 9 (DSCR PC9). Such requests should be for the standard products shown in reference (a). The numbers are DSN 695-6500, COMM (804) 279-6500, fax DSN 695-6510, COMM 804-279-6500 during duty hours (Washington DC time) or Duty Officer Pager 1-804-717-3810, during non-duty hours.

e. Foreign Charts. Forward requirements for foreign charts via COMSC (N31) to NIMA (COTN).

f. Command Address. Allowance products are mailed to the command's address shown in the Defense Automated Addressing System (DAAS). In order to standardize the process of establishing and maintaining account information at the Defense Supply Center, Richmond Product Center, all MSC Area Commands, Offices, Reserve Units, USNS and time chartered ships are required to complete DLA Form 1832 when the following occurs: (1) address change, (2) new long term charter or (3) new construction. When DD Form 1832 is filled out and signed, it can be emailed: pc9@dscr.dla.mil, faxed: (804) 279-6510, DSN 695-6510 or mailed:

**DEFENSE LOGISTICS AGENCY
DEFENSE SUPPLY CENTER RICHMOND
8000 JEFFERSON DAVIS HIGHWAY
RICHMOND VA 23297-5335**

g. Distribution Outlets. Commands and ships having immediate operational requirements may obtain NIMA products on an over-the-counter basis from the DLA Map Support

15 August 2000

Office (MSO), Norfolk; the MSO, Naples; MSO, San Diego; the MSO at ATSUGI, Yokosuka Det; or the MSO Pacific at Hickman, AFB, HI. Addresses and telephone numbers for these activities are listed reference (a).

h. DLA/NIMA Customer Visit Program. Personnel at DLA Map Support Offices and NIMA, Marine Navigation Branch, Bethesda, MD conduct ship and shore activity visits upon request to provide assistance and briefing on chart matters. Requests for such visits may be made by message, letter or telephone.

i. Consumable Products. No allowances are given for Chart/Publication Correction Record Cards, Maneuvering Board Pads and other miscellaneous forms and plotting sheets. They are listed in Volume 10 of reference (a) and may be requisitioned in accordance with standard procedures.

6. Permanent Allowance Activation. Activities responsible for initial outfitting of ships or outfitting for special operations (e.g., Prepositioning Program Manager (PM3)) shall request permanent allowances by forwarding a letter to Defense Supply Center Richmond, Product Center-9 (DSCR-JN), 8000 Jefferson Davis Highway, Richmond, VA 23297-5335, via COMSC (N31). This shall be done at least 3 months prior to activation. The specific allowance list number from enclosures (8) through (11), or a recommended allowance list, and the initial as well as AD addresses and DODAACS for all ships involved must be included.

7. Deployment Allowance Activation. These allowance lists support the crisis situation as defined earlier.

a. MSCOs to be activated have an allowance as indicated in enclosures (2) through (6). The Naval Reserve (NR) unit shall distribute charts available between the MSCOs supported and use these charts and publications as an initial allowance. The MSC Area Command activating the office shall inform DLA/DSCR-JN via COMSC (N31) of the correct DODAAC of the MSCO, the deployment allowance and additional initial distribution requirements.

b. When deployment allowance items are no longer required, they may be destroyed in accordance with applicable security regulations. No report of destruction is required. Activated deployment material should not be retained for future deployments since AD is not provided for deployment allowances beyond termination dates specified in deployment allowance activation request messages.

8. Permanent Allowance Termination

a. AD for charts may be terminated temporarily and permanent allowance charts disposed of during overhaul periods of more than 1 year. Publications, however, should be retained and maintained. Provide notification to temporarily suspend AD for charts to the DSCR-JN copy to COMSC.

b. MSC commands (ships, shore activities) that are scheduled for deactivation shall notify the DLA/DSCR-JN of the date AD is to be terminated. Destroy charts and publications in accordance with applicable security regulations.

9. Allowance Changes. Forward requests to establish or change a command or ship's allowance by annotating a second copy of this instruction and returning it to COMSC (N31). Approved requests will be forwarded to DLA/DSCR-JN.

10. Annual Inventory. Annually, the DSCR-JN provides each command and ship a printout of its AD listing. This inventory printout also may be requested at any time. Retain and file one copy of the printout with this instruction for reference purpose.

RULES OF THE ROAD					

ORDERING METHODS

1. General. DSCR-JN requests that all DOD and Federal agencies submit electronic orders via Defense Automatic Addressing System (DAAS). Electronic ordering allows GI&S consumers to take advantage of their intra-service or agency logistics systems to electronically transmit orders to DSCR-JN. In lieu of intra-support systems, alternative electronic methods are offered by the Defense Automatic Addressing System Center, Wright Patterson AFB, Ohio (DAASC). These methods greatly reduce order processing/shipping time. Electronic ordering also allows intra-support or DAAS automated systems to perform validation edits on orders prior to submission to DSCR-JN, thereby eliminating many of the errors which cause rejection or cancellation.

2. Electronic Ordering. Electronic ordering is the preferred method for ordering products; however, various means are available to enable electronic transmission of MILSTRIP or FEDSTRIP documents. Your local supply activity or logistics office is the best source for information on what is available. Some of the methods used by customers for DAAS connectivity are:

a. DAASC Automated Message Exchange System (DAMES). The DAMES requires a desktop personal computer, modem, and telephone line. Software and assistance are available from the DAASC Information Center, ATTN: Help Desk, Bldg., 30207, 5250 Pearson Rd., Wright Patterson AFB, OH 45433-5328; DSN: 986-3247; Tel: (937) 656-3247; DSN Fax: 986-3800/1; Tel. Fax: (937) 656-3800/1.

b. DAAS Integrated E-mail Logistics (DIELOG) System. This system allows access to DAAS over the Internet via the electronic mail system. For more information contact DAASC directly at E-mail: dielogreg@daas.dla.mil.

c. Streamlined Automated Logistics Transmission System (SALTS). This is a U.S. Navy developed telephone, satellite, and E-mail system with users from a variety of Services and Agencies. For more information contact the SALTS Project Office at DSN: 442-1112, Tel: (215) 697-1112, DSN Fax: 442-1476, Tel. Fax: (215) 697-1476.

d. Web Requisitioning (WEBREQ). DAAS system that allows customers to order GI&S products via an internet web site. Refer to Web Site http://www.daas.dla.mil/sar/web_req_sar.html.
