

VOLCANOES!

Activity Sheet 6.2 There's A Volcano in My Backyard!

Mount Rainier is an active volcano in the Cascade Range. During past eruptions large mudflows resulted. If similar mudflows occurred in the future, would people be in danger?

What to do

Osceola Mudflow

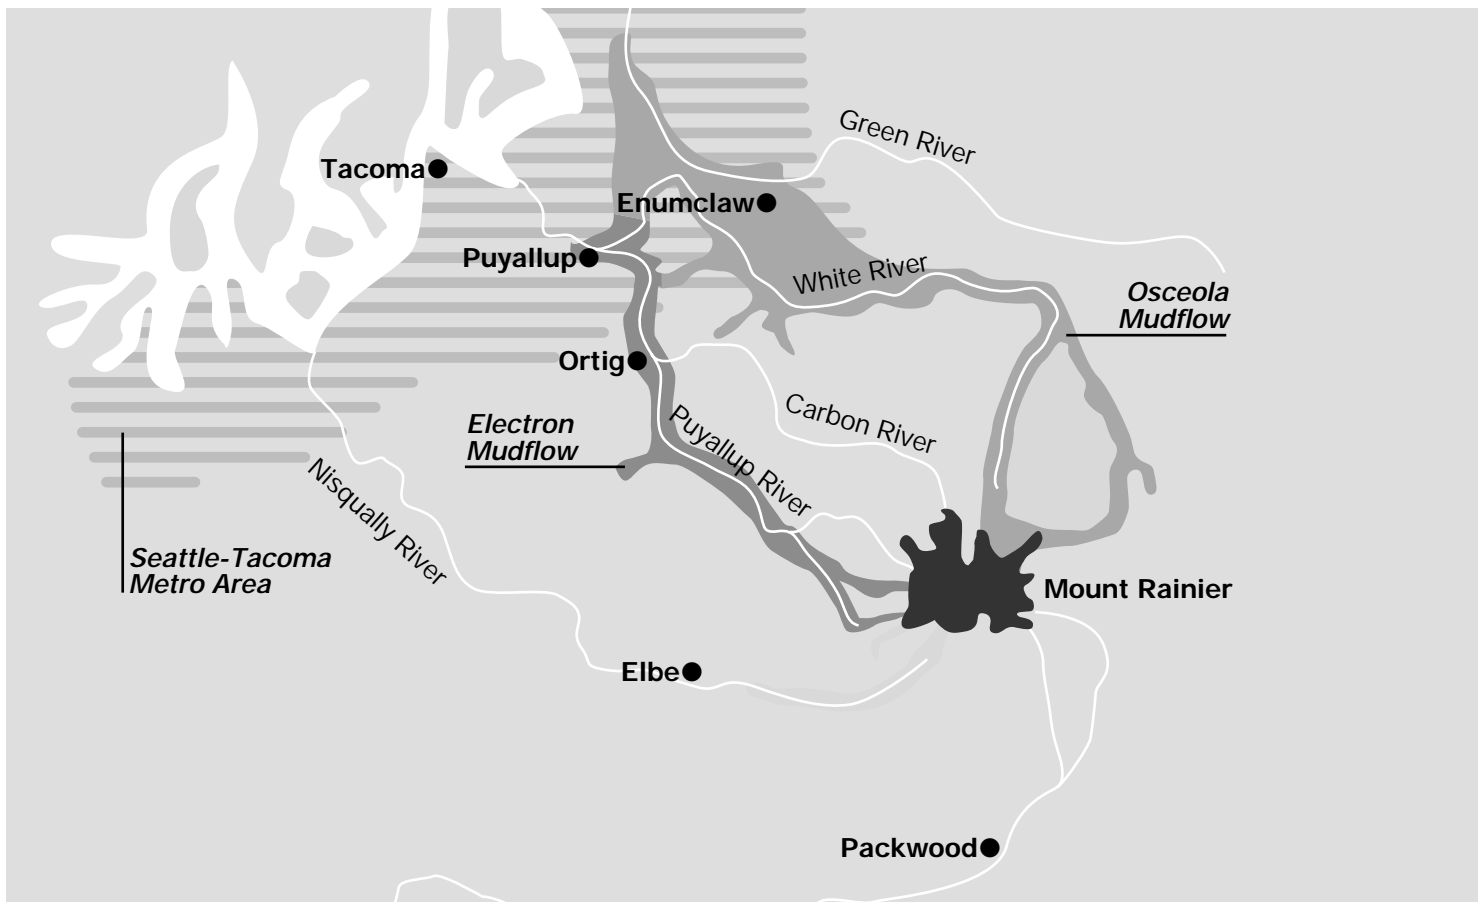

(occurred about 4,500 to 5,000 years ago)

1. Find the Osceola Mudflow on the map. Trace the course of the mudflow from where it began on the slopes of the volcano to where it ended.
2. How many kilometers did it travel? _____
3. What cities would be in danger if the Osceola Mudflow occurred today? _____

Electron Mudflow

(occurred about 550 years ago)

1. Find the mudflow on the map. Trace its course from where it began on the slopes of the volcano to where it ended.
2. How many kilometers did it travel? _____
3. What cities would be in danger if the Electron Mudflow occurred today? _____

Legend

0 50 km
