MMS Schedules Additional Anchorage Scoping Meeting for Liberty Development and Production EIS

The Minerals Management Service (MMS) will hold an additional scoping meeting in Anchorage to gather information for an environmental impact statement (EIS) on BP Alaska's Development and Production Plan (DPP) for Liberty. The meeting will be held on April 8, 1998 at the MMS Region Office, Third Floor Conference Room, 949 East 36th Avenue.

The EIS will analyze BP's proposed development and production plan, which is located on a single Federal OCS lease in the Beaufort Sea. The proposed development consists of a self-contained offshore drilling and production facility on a conventional gravel island located in Foggy Island Bay about 5 miles from shore and an associated sub sea pipeline. The Liberty DPP EIS is project specific and much more narrow in scope than a lease sale EIS. BP estimates there are 120 million barrels of recoverable oil in the Liberty Prospect. Construction activities are proposed during the 1999/2000 winter season, with first production anticipated by the end of 2000.

Through the scoping process, MMS will evaluate the important environmental, social, or economic issues that could arise from development in this area. MMS will continue to evaluate issues as they are identified.

For further information about the the scoping meeting, Liberty Project or to be placed on the Liberty Mailing List, please write to the Minerals Management Service, 949 East 36th Avenue, Room 308, Anchorage, AK 99508, or call Fred King at 907-271-6696 or Robin Cacy at 907-271-6070, toll-free at 1-800-764-2627; or via e-mail at akwebmaster.mms.gov. Please include your name, address, telephone number and fax number.
