

Weighted Average Interest Rate Update

Notice 2004-24

Sections 412(b)(5)(B) and 412(l)(7)(C)(i) of the Internal Revenue Code provide that the interest rates used to calculate current liability and to determine the required contribution under § 412(l) must be within a permissible range around the weighted average of the rates of interest on 30-year Treasury securities during the four-year period ending on the last day before the beginning of the plan year.

Notice 88-73, 1988-2 C.B. 383, provides guidelines for determining the weighted average interest rate and the resulting permissible range of interest rates used to calculate current liability.

Section 417(e)(3)(A)(ii)(II) of the Code defines the applicable interest rate, which must be used for purposes of determining the minimum present value of a participant's benefit under § 417(e)(1) and (2), as the annual rate of interest on 30-year Treasury securities for the month before the date of distribution or such other time as the Secretary may by regulations prescribe. Section 1.417(e)-1(d)(3) of the Income Tax Regulations provides that the applicable interest rate for a month is the annual interest rate on 30-year Treasury securities as specified by the Commissioner for that month in revenue rulings, notices or other guidance published in the Internal Revenue Bulletin.

The rate of interest on 30-year Treasury Securities for February 2004 is 4.93 percent. Pursuant to Notice 2002-26, 2002-1 C.B. 743, the Service has determined this rate as the monthly average of the daily determination of yield on the 30-year Treasury bond maturing in February 2031.

The following rates were determined for the plan years beginning in the month shown below.

| Month | Year | Weighted Average | 90% to 105% Permissible Range | 90% to 110% Permissible Range |
|-------|------|---------------------|-------------------------------------|-------------------------------------|
| March | 2004 | 5.21 | 4.69 to 5.47 | 4.69 to 5.73 |
