GEO-POLITICAL TAGS

(Office of Origin: A/RPS/IPS)
(TL:TAGS-20; 07-06-2004)

Geo-Political TAGS consist of two-letter codes for countries and world regions. The country codes are taken from the Federal Information Processing Standards Publication No. 10 (FIPS). Some of the Regional TAGS are based strictly on geographic locations while others are based on political regions. Geographic/Region TAGS identify the country or area that is the subject of the message. They also specify the country or area in which an event takes place or the country or area taking or participating in an action.

Examples: Presidential election in France
TAGS: PGOV FR

Israel's military intervention in Lebanon
TAGS: MOPS IS LE

Geo-Political TAGS are arranged in four subsections: The first section is alphabetized by world region TAGS and includes the countries in each region. The second section is alphabetized by country, listing the country TAGS followed by the various regional TAGS. The third section is listed in alphabetical order by country and region TAGS. The fourth section has the region TAGS alphabetized by region and by TAGS.

USING GEO-POLITICAL TAGS

More than one Geo-Political TAGS may be used on the same message to express a relationship between two or more countries or to indicate participation of several countries in an action or event.

Examples: A document discussing arms control agreement negotiations between the *United States* and Russia would have the following TAGS entries:

TAGS: PARM US RS

A document discussing a telecommunication agreement among the United States, France, and Germany would have the following TAGS entries:

TAGS: ECPS US FR GM

The “US” TAGS should be used whenever a message concerns explicit U.S. involvement in an issue, act or event. The “US” TAGS should not be used merely to indicate a message being sent from a Foreign Service post to the Department nor should a country code be used on a message in the case of any event being reported by a Foreign Service post in which the host country is not involved.

Example: Reporting from Dublin about a riot in Northern Ireland.
(Southern Ireland is not involved)
TAGS: PINS UK

Geo-Political TAGS need not be used on messages pertaining to administration and operations when such TAGS only identify the location of a Foreign Service post.

Examples: HHE Shipment from Bonn
TAGS: ATRN
Budget Report from Paris
TAGS: ABUD

This does not preclude, *however*, the use of Geo-Political TAGS on a(n) A, B, C or O TAGS documents if a country is involved in an event. TAGS for a world region should be used when a large geographic or geo-political area is discussed in a message.

Example: U.S. policy toward Southern Africa
TAGS: PREL US ZU

Some of the regional TAGS have been expanded and/or modified to include regional political reporting. Each regional tag is expanded to indicate what countries and islands make up the area.
