Effective Date: April 1, 2004

Implementation Date: April 1, 2004

Temporary Hold of Outpatient Claims Subject to the Outpatient Prospective Payment System (OPPS) in April 2004

Provider Types Affected

Hospitals and other providers submitting outpatient claims subject to the OPPS.

Provider Action Needed

No action is needed. This article is informational only.

Background

On March 25, 2004, the Centers for Medicare & Medicaid Services (CMS) released the April 2004 OPPS PRICER software to the maintainers of the systems used by Medicare Fiscal Intermediaries (FIs) in processing Medicare outpatient claims subject to the OPPS.

To allow sufficient time for the testing and installation of this software by the FIs, CMS has instructed the FIs to hold outpatient claims, which are subject to the OPPS and contain dates of service on or after April 1, 2004. The FIs will hold such claims until their systems are ready to process them using the April 2004 OPPS PRICER, but the FIs must begin processing these claims on or before April 19, 2004.

Because Medicare does not make payment for claims received electronically until 14 days after receipt, at the earliest, it is unlikely that any such claims would have been eligible for payment until April 15. Thus, this delay should have little, if any, adverse impact on affected hospitals and providers, especially since the FIs must begin processing the held claims no later than April 19.
