

Low Risk Canadian Products

Description	Required Risk Mitigations <i>Import Permit Req'd for All Products</i>
Whole dressed carcass (eviscerated with head removed) or meat of wild sheep, goats, other non-cervid ruminants for personal use ¹	CFIA to verify annually that feeding processed feed to wildlife is not a common occurrence in the province where the animal was harvested. Hunter must show proof animal was a legally harvested wild (not ranched) animal. Such proof will include the hunting license or equivalent.
Whole dressed carcass (eviscerated with head removed) or meat of wild cervids for personal use	CFIA to verify annually that feeding processed feed to wildlife is not a common occurrence in the province where the animal was harvested. Hunter must show proof animal was a legally harvested wild (not ranched) animal. Such proof will include the hunting license or equivalent.
Meat (bone in or bone out) from caribou and musk ox harvested in the province of Nunavut	CFIA to verify annually that there is no feeding of mammalian protein. CFIA verification that meat is from wild animals harvested on Nunavut lands, processed in a dedicated facility, and brain and spinal cord removed prior to processing.
Cleaned hide and trophy of wild ruminants (skull and antlers) free of tissue including brain and lymphoid tissue, for personal use	Entry with proof that animal was legally harvested.
Animal feed including milk replacer and pet food, and feed ingredients containing only non-ruminant products	CFIA to certify based on inspection non-ruminant source and dedicated facility (Note: milk and milk protein are permitted to be of ruminant origin)
Tallow for non-animal feed use	APHIS import permit with restriction for other than animal feed use
Preps W/Vitamin B12, For Supplementing Animal Feed	CFIA confirm non-ruminant components
Vaccine For Veterinary Medicine for use in non-ruminants	Biologics permit
Finished pet chews made from bone, ligaments, hides or hooves	CFIA verification that product does not contain SRM's; product must be fully processed and packaged for final use; added flavorings must be of non-ruminant origin.
Fresh or Frozen Bovine Liver	Certificate indicating pure liver; no air-injected stunning used at slaughter

¹Personal use refers to meat and trophies from animals that are legally harvested.

Description	Required Risk Mitigations <i>Import Permit Req'd for All Products</i>
Veal (including carcasses) from calves 36 weeks of age or under	CFIA verification that the calves were 36 weeks of age or less when slaughtered and are not known to have been fed prohibited products during their lifetime, and that either tonsil and intestine were removed or that the calves were only fed milk protein or milk replacer that was of U.S. origin
Sheep or goat meat, boneless, fresh or frozen, from animals under 12 months of age – (no advanced meat recovery (AMR), mechanically separated meat, ground meat, or low-temperature rendered product acceptable) <i>[includes trim/manufacturing trim derived from skeletal muscle with associated tissues, not including any ground meat, trim derived from a mechanical separation process (including AMR), or derived from vertebral column]</i>	CFIA verification that the animals were under 12 months of age when slaughtered and are not known to have been fed prohibited products during their lifetime; no visible nervous or lymphoid tissue (if frozen, verify no visible nervous or lymphoid tissue prior to freezing).
Cervidae meat from domesticated farmed animals processed in a slaughterhouse; bone in or bone out, fresh or frozen ground meat or sausage is allowable if it is derived from either (1) only cervidae meat or (2) only cervidae and porcine meat.	CFIA verification that the animals were born after the feed ban and are not known to have been fed prohibited products during their lifetime; no visible nervous or lymphoid tissue (if frozen, verify no visible nervous or lymphoid tissue prior to freezing). Animals must be members of a herd enrolled in a program that meets the standards of the Canadian Chronic Wasting Disease Herd Certification program.
Products (including meat or trophies such as antlers or skull) from Cervids harvested on a game farm or similar facility (so-called “shooter bulls” or “shooter bucks”); meat may be one in or bone out, fresh or frozen; ground meat or sausage is allowable if it is derived from either (1) only cervidae meat or (2) only cervidae and porcine meat	CFIA verification that the animals were born after the feed ban and are not known to have been fed prohibited products during their lifetime; no visible nervous or lymphoid tissue (if frozen, verify no visible nervous or lymphoid tissue prior to freezing). Animals must be sourced from a herd enrolled in a program that meets the standards of the Canadian Chronic Wasting Disease Herd Certification program.
Bovine Meat, Boneless Fresh or Frozen from animals under 30 months of age – (no advanced meat recovery, mechanically separated meat, ground meat, or low-temperature rendered product) <i>[includes trim/manufacturing trim derived from skeletal muscle with associated tissues, not including any ground meat, trim derived from a mechanical separation process (including AMR), or derived from vertebral column]</i>	CFIA verification that the calves were under 30 months of age when slaughtered and are not known to have been fed prohibited products during their lifetime; brain and spinal cord are removed; slaughter plant only kills animals less than 30 months of age.
