### The United States Perspective On Financing For Development -- Lasting Results

### **October 15, 2004 United States Department of State**

### **Financial Resources for Developing Countries**

For the year 2003:

> Developing economy exports totaled \$3.1 trillion.

➢ Foreign direct investment flows into developing countries from OECD countries were \$192 billion.

> Portfolio investment flows into developing countries were \$27.4 billion.

> Workers' remittances to developing countries totaled \$93 billion.

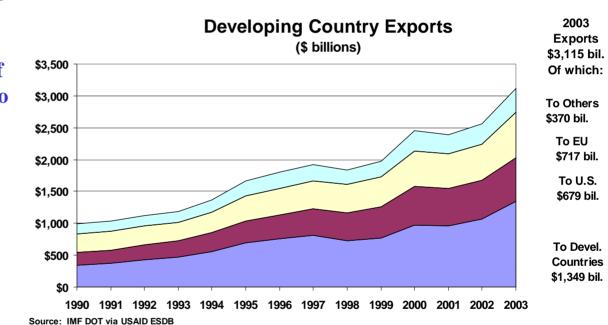

> Official Development Assistance (ODA) from all sources totaled \$77 billion.

## **Trade as an Engine of Growth**

\* The evidence shows that countries more open to trade grow substantially faster than those not integrated into global markets.

Developing country exports amounted to \$3.1 trillion in 2003
-- over one third of their GDP.

>Over 40%, or \$1.35 trillion, of developing country exports go to other developing countries.

➢ Their United States trading partner imports over 20% of their exports, or \$679 billion – more than any single country.

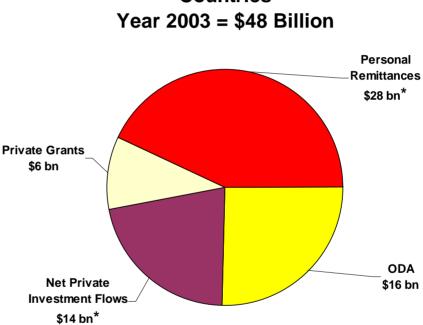

➢ World Bank estimates developing country income would rise by \$532 billion per year by 2015 with fully liberalized trade.

### U.S. Financial Flows to Developing Countries: \$46 Billion

Non-trade financial flows from the U.S. – personal remittances, net private investment, and NGO grants – total some \$48 billion, nearly three times the size of U.S. ODA flows.

U.S. Net goods imports from developing countries were \$354 in 2003 – dwarfing the size of other financial flows to these countries, and this figure does not include services trade.

U.S. Non-Trade Financial Flows to Developing Countries Year 2003 = \$48 Billion

**U.S. DEPARTMENT** of STATE

Note: Net Private Investment flows differ from the Foreign Direct Investment flows described earlier because they include not only net FDI flows, but also net long-term bank lending and other private securities and claims.

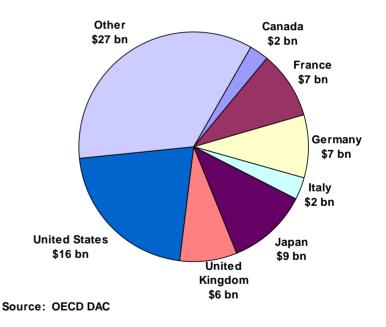

# **Official Development Assistance (ODA) Can Be A Catalyst for Lasting Change**

> The United States is the world's largest contributor of development assistance at \$16.3 billion.

➤U.S. ODA growth rate over the past 3 years has averaged well over 12 percent.

The contribution of assistance from the new Millennium Challenge Account --\$1.0 billion in start-up money this year, ramping up to \$5 billion per year by FY2006 -- will significantly add to our commitment towards development.

#### Official Development Assistance Preliminary 2003 Total = \$77.2 Billion

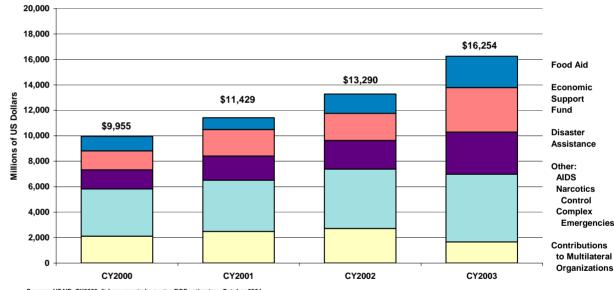

# The United States Honors Its Pledge to Increase ODA -- <u>Early</u>

➢At a March 2002 UN Conference on Financing for Development held in Monterrey, Mexico, the United States pledged to increase its foreign assistance by 50 percent over 2000 levels by 2006.

➤ The U.S. met that pledge 3 years early. U.S. ODA for 2003 was \$16.3 billion, more than 60 percent higher than it was in 2000.

➢ By 2006, U.S. ODA will be twice the 2000 contribution.

# The New U.S.Millennium Challenge Account: An Innovative Approach to Development

### The MCA Rewards Nations that:

- ≻<u>Govern Justly</u>
  - •With the Rule of Law
  - •With Accountability and Transparency
  - •By Protecting Human Rights
  - •By Fighting Corruption and Promoting Inclusion
- ≻<u>Invest in Their People</u>
  - •By Promoting Educational Opportunity
  - •By Providing Resources for Public Health
- Encourage Economic Freedom
  - •By Enabling the Private Sector with Growth-Oriented Policies
  - •With a Stable Macroeconomic Environment
  - •Through Trade and Investment Openness
  - •By Promoting Enterprise and Opportunity

# **Meeting the Challenges**

Millennium Challenge Account puts incentives in place to reward development strategies that work:

➢ <u>First</u> - by setting high policy- and commitmentbased MCA eligibility requirements, measured by independent, publicly available and objective criteria;

➢ Second - by providing substantial additional support to proposals developed by the countries themselves; and

➤<u>Third</u> - by insisting upon measurable results on mutually agreed-upon development goals from our MCA partnerships.
