

HEART DISEASE *doesn't* CARE WHAT YOU WEAR

Angela Lindvall, Cover Girl, Photographed by David LaChapelle for The Heart Truth

IT'S THE #1 KILLER OF WOMEN

Being a woman doesn't protect you from heart disease. Try these risk factors on for size: Do you have high blood pressure? High blood cholesterol? Diabetes? Are you inactive? Are you a smoker? Overweight? If so, this could damage your heart and lead to disability, heart attack, or both.

Talk to your doctor to get answers that may save your life. The truth is, it's best to know your risks and to take action now.
