Major Duties:

The Alternate Crops & Systems Lab (ACSL) applies systems theory to the solution of complex agricultural problems and to the development of computer- aided farm decision support systems. Undertakes research to analyze and design systems, to develop models and expert systems, and to generate and evaluate databases. Carries out studies to improve the growth, yield and quality of horticultural and agronomic crops through increased understanding of mechanisms controlling response and adaptation to CO₂, UV-visible-IR radiation, water, temperature, air pollution, soil chemistry and other environmental conditions. Studies are undertaken at molecular, biochemical, organismic and community levels in controlled environments, greenhouses and in the field, exploiting natural and induced genetic variability and emphasizing interactions among environmental variables. Carries out basic and applied research to discover and improve methods for biological control of plant pathogens and weeds using beneficial microbes. Develops, expands, and utilizes principles of weed science in order to reduce the impact of weeds.

You will actively participate in one or more research phases by performing a variety of complex technical duties to scientists conducting research on experimental plants grown in a controlled-environmental chambers outdoors and indoors. Technical duties will include: adapts, modifies or develops new techniques and/or procedures; performs the full range of techniques and studies using a variety of specialized equipment, maintains, calibrates and modifies complex/specialized equipment and automated systems used for test and evaluation procedures; independently initiates action to resolve or correct technical difficulties and results, or recommends resolution to supervisor; searches for literature for new procedures or techniques to use in the field, or greenhouse; collects, prepares, evaluates and verifies samples and supporting records; keeps detailed records of experimental data; tabulates, statistically analyzes and summarizes data using personal computers and software packages; maintain inventory of chemicals, stock solutions and prepares solutions and reagents for use in field, or greenhouse, and safely disposes of waste material (both chemical and biological); keeps work-site in a neat and orderly manner.

Qualifications Required: Your education and experience will be evaluated against all qualification requirements (basic and any additional requirements) listed below.

Basic Requirements

GS-6: 1 year of specialized experience equivalent to the next lower grade OR 1/2 year of directly related graduate education.

GS-7: 1 year of specialized experience equivalent to the next lower grade OR 1- year of directly related graduate education.

If qualifying all or in part based on your education, please submit a copy of your college transcripts OR a list of college courses with credit hours, dates completed, and grades received. If this information is not provided, your education may not be appropriately evaluated and you may lose consideration for this position. If your qualifications are based in any part on education and you are selected for this position, you will have to provide an official copy of your academic transcripts prior to entering on duty.

Specialized Experience - experience which has equipped you with the following Knowledge, Skills and Abilities - 'KSAs' required to perform the duties of this position:

1. Knowledge of biological methods and procedures.
2. Ability to operate and maintain specialized equipment and instruments, such as CO₂ Analyzers, equipment to measure soil and air temperature, soil water content, root growth and canopy transpiration.
3. Ability to adapting, modifying or developing new techniques and/or procedures.
4. Ability to use a computer and associated applications, such as word processing and spreadsheets to obtain, tabulated, analyze, and summarize data.

Selective Placement Factor(s) - In order to be considered minimally qualified, you must also possess the following:

1. Ability to take measurements and analyze data related to plant growth and development (e.g. photosynthesis, respiration, transpiration and root growth and water uptake)

Other Important Information

Benefits Package:

A Benefits Package is authorized for this position. Additional information about Federal benefits can be obtained at www.usajobs.opm.gov/ei61.htm.

Veteran's Preference:

For further details, call the U.S. Office of Personnel Management (OPM) at 478-757-3000 or TDD 478-744-2299.
