

Mr. Secretary Donald Clark

The word "made in the U.S.A." should mean only one thing & that's exactly what it says. Not made overseas & stamped made in the USA. The only reason for doing this is to mislead the purchaser who is trying to support the business & workers that are paying taxes to our country & supporting it. Not shipping jobs & manufacturing overseas to avoid taxes & wages. If they want it to say made in the USA, then let them make it here period. Don't give a manufacturer the unfair advantage of making a product overseas and

marking it made in the USA. It's
not fair to the people who pay the
taxes that pay your wages. If
this passes I certainly wouldn't
support you or anything even
remotely connected to you.

Sincerely
John T. Connor
