

7/30/97

Dear Secretary Dollar

I'm writing you concerning the "made in the USA" designation. If it is not made in California, New York, Oregon or any of the 50 states its not made in America. Its simple. If parts come from Bangkok, Mexico, Shanghai, or any other country or if part of it is assembled there, then it is not made in the U.S.A.

Please do not water down our country and what we stand for. Some of us want to support American workers and the products made by them. So please see that "made in the USA" means just that. Thank you.

Sincerely
Robert W Hoffman
