

July 28, 1997

Secretary Donald Clark
Federal Trade Commission
6th St. & Pennsylvania Ave, N.W.,
Room 172
Washington, D. C. 10580

Gentlemen:

I just read an article published to inform the "American Citizen" of what your Trade Commission is considering in doing with the "Made in the USA" label.

Our government & organizations such as yours have already ruined working conditions for the working people by allowing all the corporations to move into all other countries all over the world in order to get cheap help. Our "American Citizens" are getting laid off by the hundreds of thousands from a decent paying job that they have worked at all their life in order for "Big Money" & "Crooked Politicians" to make their own bank accounts larger every year. The working person has to have two to three jobs in order to raise a family & live a life style as they were once accustomed to.

Now, you are going to cheapen the value of our "Made in the USA" label to something cheap, that it has never stood for before. At least, it has always before stood for something that really meant a great deal to the hard-working "American Citizen".

Now, the things that you are proposing to do with it, will make it into a big, phoney situation that will not even stand for much of anything. Except to try to pull the wool over everyones eyes. What is the use of even putting it on any articles at all, when it will not mean anything that tells the truth about anything.

Yours Truly,
An "American Citizen"
