**Table 3-17.**

**CONTINUING OIL, GAS, AND GEOTHERMAL ACTIVITIES  
ON FEDERAL LANDS AS OF SEPTEMBER 30, 1999 — concluded**

**FOOTNOTES**

- /a/ Data comes from the Bureau of Land Management's Case Recordation System and is current as of January 31, 2000.
- /b/ Service holes and completions are not necessarily located on producible leases. Data comes from the Bureau of Land Management's Automated Inspection Record System.
- /c/ Nearly all geothermal resources developed on Federal lands are utilized for electrical generation (indirect use). Royalties generated from geothermal resources were over \$18 million in FY 1998.
- /d/ Direct Use is measured in British thermal units, or Btu's. One Btu is the quantity of heat required to raise the temperature of one pound of water one degree Fahrenheit at standard conditions, and is also equal to 252 calories.
- /e/ Total Electrical Generation is measured in million megawatt-hours, or mMh.
- /f/ Data not available; production amount is insignificant.
