

Table 6-2. CAPITAL IMPROVEMENTS ON PUBLIC LANDS, FISCAL YEAR 1999

Administrative State	Number of Buildings /a/	Number of Administrative Sites /a/	Number of Recreation Sites /a/	Miles of Roads /a/	Miles of Trails /a/	Number of Bridges /a/
Alaska	333	30	67	39	2,633	14
Arizona	166	97	204	2,772	427 /b/	2
California	518	130	238	4,846	3,625	91
Colorado	219	48	217	3,939	370	20
Eastern States	0	0	0	0	0	0
Idaho	346	47	267	8,461	3,181 /c/	45
Montana	237	51	217	2,511	288	29
Nevada	142	48	88	8,088	76	9
New Mexico	35	6	51	7,330	173	0
National Interagency Fire Ctr	19	1	0	0	0	0
Eastern Oregon	356	69	163	9,441	336	31
Western Oregon	425 /d/	52	124	18,230 /d/	324	521 /d/
Utah	395	58	152	9,600	2,345	9
Wyoming	164	25	59	3,990	58	40
Total	3,355	662	1,847	79,247	13,836	811

FOOTNOTES

- /a/ The Bureau is continuing its re-inventory and condition assessment surveys of facilities that began in 1998, and some numbers have been adjusted as a result of this effort. The purpose is to update information for the Facilities Inventory and Maintenance Management System (FIMMS) database and Five-Year Deferred Maintenance Plan for fiscal years 2000 through 2004.
- /b/ Following a management decision to maintain several trails of historical significance, Arizona entered historical trails into FIMMS for the first time. This accounts for the 48 percent increase in miles of trails from 1998.
- /c/ Following an in-depth inventory of its trail system, Idaho entered historical and river trails into FIMMS for the first time. This accounts for the 128 percent increase in miles of trails from 1998.
- /d/ The 42 percent increase in number of buildings, 30 percent increase in miles of roads, and 48 percent increase in number of bridges for Western Oregon reflect existing structures that were added to the FIMMS as a result of re-inventory and condition assessment surveys in 1999.
