Date: MAY 2, 2003

CHANGE REQUEST 2645

SUBJECT: Continuation of April and July 2003 Change Requests (CRs 2427 and 2527): Process all Medicare Part B Provider Enrollments in the Provider Enrollment Chain Ownership System (PECOS). Create Import/Export Functionality Between the VIPS Medicare System (VMS) and PECOS

The following table lists the CRs for the complete PECOS/MCS/VMS/PES/PENS CR package for the October 2003 release. (Highlighted row indicates the current CR.)

CR #	Change Request Description
2642	Continuation of April 2003 CR 2424 and July 2003 CR 2524: Create import/export functionality between the UPIN and PECOS.
2643	Continuation of April 2003 CR 2425 and July 2003 CR 2525: Create import/export functionality between Medicare Claims System (MCS) and PECOS.
2644	Continuation of April 2003 CR 2426 and July 2003 CR 2526: Process all Medicare Part B provider enrollments in PECOS. Modify MCS to incorporate all claim payment and provider correspondence functionality that is included in the Provider Enrollment System (PES) but will not be a part of PECOS.
2645	Continuation of April 2003 CR 2427 and July 2003 CR 2527: Process all Medicare Part B provider enrollments in PECOS. Create import/export functionality between VMS and PECOS.

I. GENERAL INFORMATION

- A. Background:** PECOS Release 3 is scheduled to go live for carrier use on October 6, 2003. With this release, all carriers must enter all provider/supplier enrollment data into PECOS. Carrier provider/supplier enrollment data will no longer be entered into PES or PENS. All functions associated with provider enrollment will be handled by PECOS. PECOS will assume the responsibility for communicating with UPIN to obtain the providers' UPIN number and will work with the system maintainers of UPIN to develop import/export functions. PECOS will also assume the responsibility of communicating provider data to MCS and VMS and will work with the MCS and VMS system maintainers to develop the necessary export/import functions. This CR contains the requirements and design considerations that must be coded, tested and implemented for the October 2003 release.
- B. Policy:** Collection and retention of Form CMS-855 enrollment data has been cleared through a Paperwork Reduction Act Notice in the **Federal Register**. The authority for the various types of data to be collected is found in multiple sections of the Social Security Act and Code of Federal Regulations. Specifically in §§1816, 1819, 1833, 1834, 1842, 1861, 1866, and 1891 of the Act and 42 CFR subchapter E.

II. BUSINESS REQUIREMENTS

Requirement #	Requirements	Responsibility
1	VMS must accept an extract file of provider data from PECOS. This provider data will be used to populate the VMS production provider file.	Carriers (VMS Standard System).
2	VMS must provide an extract file to PECOS. This extract file must provide the following information: <ul style="list-style-type: none"> • Confirmation of the PECOS feed into VMS. • Inactive Providers. 	Carriers (VMS Standard System)
3	Disable all PENS provider enrollment functions. Carriers will no longer enter provider data into PENS. Change users' security level in PENS to allow them view only access to the PENS data. Upon completion of the October 2003 CR, carriers will be responsible for entering all Medicare provider enrollment data into the PECOS system.	Carriers (VMS Standard System)
4	Disable the VMS-UPIN export/import function. PECOS will assume the responsibility of sending UPIN an extract of the provider enrollment data needed to enumerate the provider with a unique Medicare identification number. PECOS will accept a file from UPIN containing the provider's UPIN number and store this number into the PECOS file.	Carriers (VMS Standard System)

III. SUPPORTING INFORMATION AND POSSIBLE DESIGN CONSIDERATIONS

A. Other Instructions:

X-Ref Requirement #	Instructions
1	Format for PECOS extract to VMS needs to be defined and created.
2	Format for VMS extract to PECOS needs to be defined and created.

B. Design Considerations:

X-Ref Requirement #	Recommendation for Medicare System Requirements
1	When VMS receives an extract file from PECOS, VMS should create a file/report that confirms that the extract file was processed correctly.
3	Carriers will no longer enter Medicare provider enrollment data into the PENS system. As of October 2003 carriers will enter Medicare provider enrollment data into PECOS.
4	PENS will no longer send data to the UPIN system. PENS will no longer receive and store the UPIN number. PECOS will be responsible for these functions.

C. Interfaces:

PECOS will send provider data extracts to the VMS system. PECOS will accept a file from VMS confirming that the PECOS extract to VMS was processed successfully. PECOS will accept a file from VMS containing inactive providers.

D. Contractor Financial Reporting /Workload Impact:

There will be no affect on providers or contractors.

E. Dependencies:

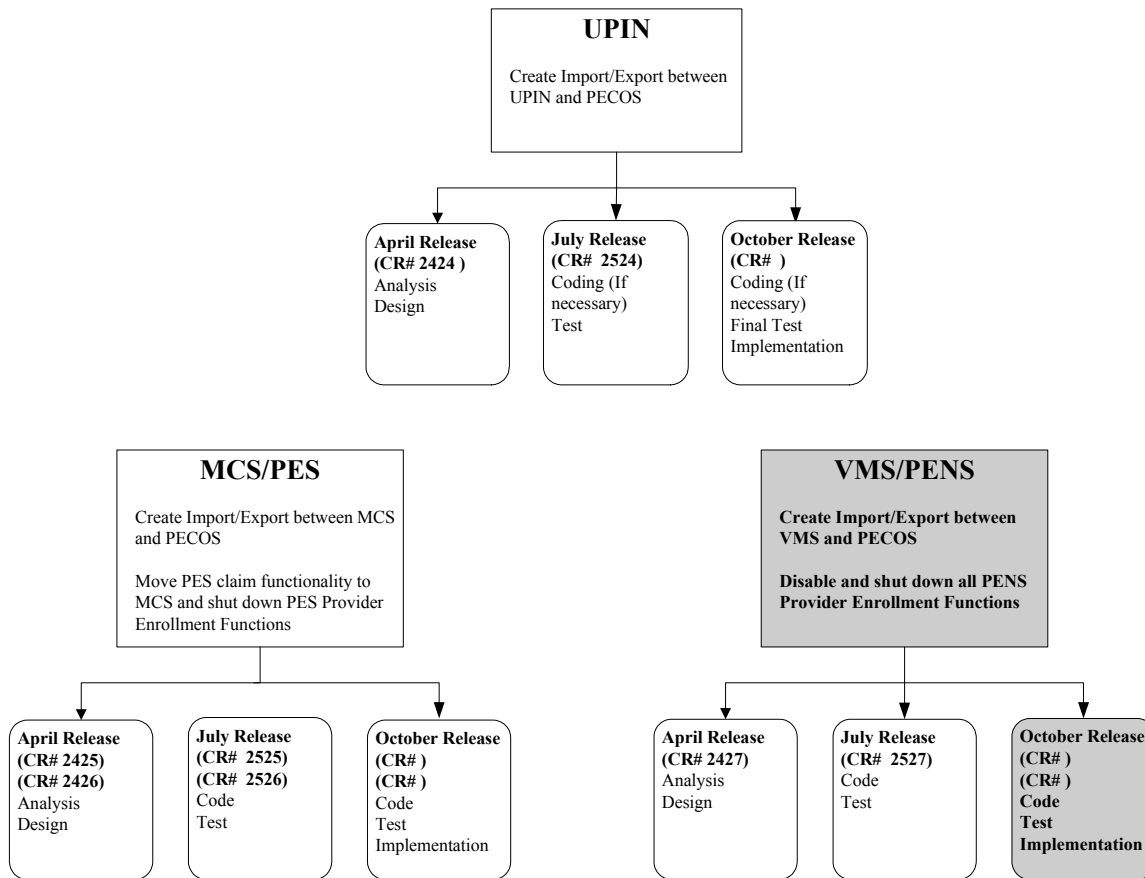

F. Testing Considerations:

- Testing should validate that VMS and PECOS can create and process extract files from each other.
- PECOS should export data to a VMS test region and validate that the data was exported to VMS successfully.
- VMS should export data to a PECOS test region and validate that the data was exported to PECOS successfully.
