

NIA Environmental Workshop for Genetically Informative Studies on Aging

February 26-27, 2003

Residence Inn
7335 Wisconsin Avenue
Bethesda, Maryland 20814

AGENDA

Wednesday February 26

8:30	Continental Breakfast	
9:00	Welcome, introduction of participants, background and introduction of workshop	R. Suzman/ J. Harris
9:45	Presentation and discussion of paper I: Genetic studies of environmental mechanisms in childhood: Are there lessons for the lifespan?	K. Deater-Deckard
10:45	Coffee Break	
11:15	Presentation and discussion of paper II: Influence of the 'environment' on the cognitive and brain plasticity of older adults.	A. Kramer
12:15	Lunch	
1:30	Discussion session I	R. Krueger
2:15	Presentation and discussion of paper III : Studying Social Context in Gene-Environment Interactions	M. Shanahan
3:15	Coffee Break	
3:35	Presentation and Discussion of paper IV: Models for the Genetic Analysis of Developmental Change: Can Statistical Genetic Models Help Resolve Mechanisms of Aging?	L. Eaves
4:35	Discussion session II	E. Grigorenko
5:20	Adjourn for day	

Thursday February 27

9:00	Continental Breakfast	
9:30	Summary and Comments from Day I	J. Harris
9:45	Presentation and discussion of paper V: From the Outside In: Social regulation of the neuroendocrine mechanisms of fertility, aging and disease	M. McClintock
10:45	Coffee Break	
11:15	Presentation and discussion of paper VI: Social Environments and the Genetics of Aging: Advancing Knowledge of Protective Health Mechanisms	C. Ryff
12:15	Lunch (brought in)	
1:00	Discussion session III	G. Berntson
1:45	Wrap up session, plans for papers, future directions (Coffee and drinks available)	Discussants & Participants
2:30	Meeting Adjourns
