Subject: Spyware Workshop - Comment, P044509

I am very tired of having to spend extra money getting rid of spyware and adware. I am disabled and my computer is my lifeline.

I'm able to keep up with my friends through the computer and act as a good citizen. I'm able to research candidates which allows me to be an informed voter. I've been able to put up a website to help other injured workers. Without the computer not only would I be housebound but I would never be able to have a life.

Please do what you can to take care of these problems. I've had to spend alot of money and time removing these things because they interfere with the computer running properly.

In fact I just had to reformat my hard drive to get rid of some of these malicious programs.

Thank you.
