Subject: Spyware Workshop - Comment, P044509

Dear Sirs:

I think I hate spyware and adware more than viruses. It is an epidemic and causes all kinds of problems with Window, popups, etc. Please, make these guys leave us all alone. The creators of this junk know that if we had a choice, we would NOT allow this c\*\*p on our computers, period.

These idiots claim to have their rights violated if legislation is passed prohibiting their nefarious activities, when in fact they are invading our privacy. The right to swing your arm ends where my nose begins.

Thanks for your help.  
Sincerely,  
James G. Glass
