Please take seriously the need to protect those of us who do not want to receive all this adware mail. I spend most of my time deleting stuff I have no interest in, at all. Recently I had to purchase a program to clean out the 157 spyware attachments on my computer, just to keep out the pornographic mail I was receiving. This is disgusting!

They may want their freedom to circulate their ads, but I need some freedom to NOT receive what I don't want!

Thank you for taking this seriously and looking to really DO something about it!

Sincerely,

(Mrs.) Dorothy B. Evans
