

Dear Friends at the FTC

All I am worry about is those e mails that DO NOT have below the link to click if you want not to get no more.

In other words I am not against spam or any kind of ads,porno or not.

If the reciever does not want them then he/she can click on the link below so no more e mails will be sent

Now that works pretty well,they do not send you nomore.

But the problem I have is that some e mails keep on coming and there is NO WAY to stop them:no links below.

I have yahoo mail and put the spam guard on. All it does is put them in the bulk, instead of the IN BOX. But they still take a lot of space form my mail box.I told yahoo mail webmaster that they should up date the e mail in a way, that when a consumer marks the SPAM box in the e mail, THAT E MAIL ADDRESS MUST be blocked and no e mailles recieved. If there is a link below , no problem.

But if there is no link below, then WHAT?

Are we going to recieve this ads for ever taking more space on my mail box?

Let me tell you something very interesting:  
First they started with one a day and i let it go.  
After a few weeks they did increase to several a day and then i was able to cancel them all,by clicking on the link below.But then, when everything was xld, I start recieving the ones without the link below and they come several a day now...  
So as you see it looks that they do it in revenge because I xld the first ones....

This is going too far I think.

Any comments?

Thanks and regards
