

I support any proposal you can to delete the sending of the sexually oriented material. Without fail I am unable to open my e-mail box and usually have 4-5 sexually-explicated messages. I am most offended with this kind of trash. ALSO I am afraid that there could be a VIRUS in such mail. I try to BLOCK SENDER before deleting the mail from names unknown to me. I do not open and read any of it.

Please continue to have this span deleted or carry the warning "sexually-explicit-content"

Thank You
