Option-1

Download the extract program from the URL
http://www.fastlane.nsf.gov/GetUrlContents.class
Click 'Save' and save it as GetUrlContents.class
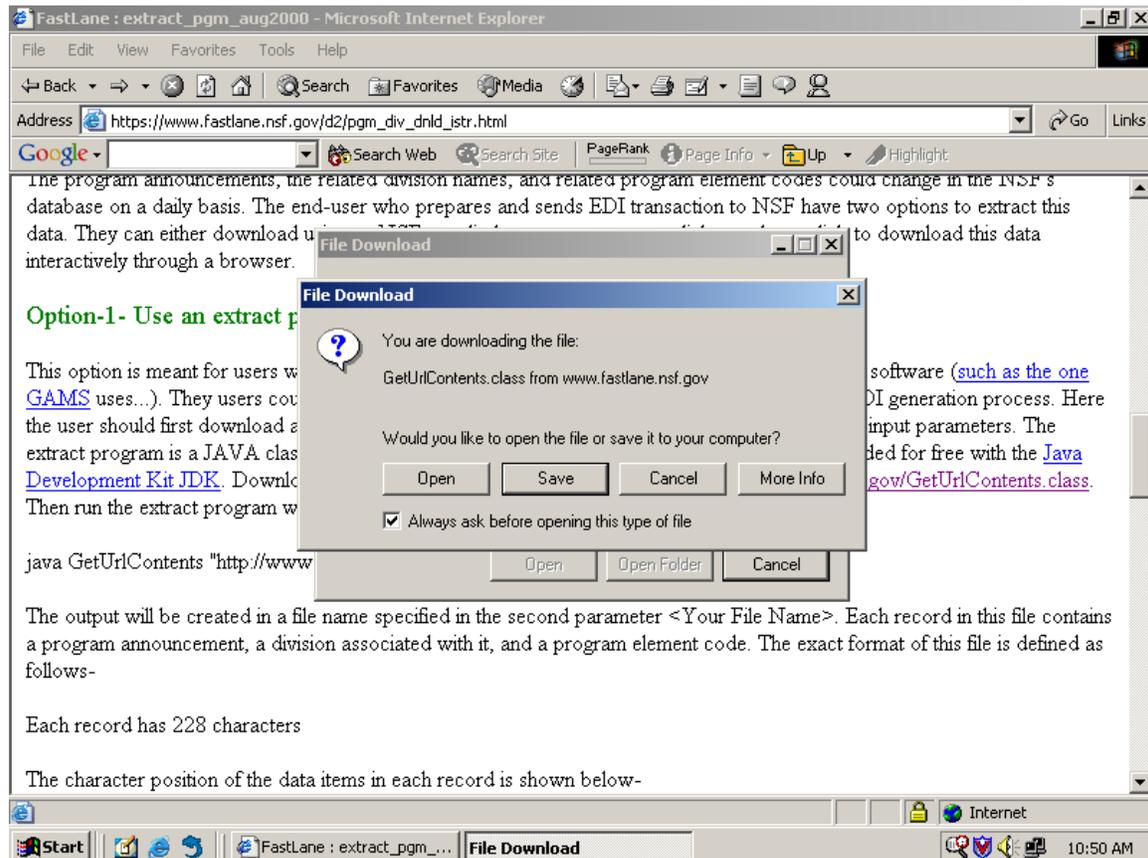

Now that the extract program has been downloaded, run it to extract the data into an output file named "pgm_annc_div_names" using the JAVA interpreter.

```
C:\download>java GetUrlContents http://www.fastlane.nsf.gov/cgi-bin/get_pgm_annc
pgm_annc_div_names
The name of the output file is pgm_annc_div_names

C:\download>dir pgm_annc_div_names
 Volume in drive C has no label.
 Volume Serial Number is 34B5-CFB3

 Directory of C:\download

07/23/2002  10:59a             2,822,330 pgm_annc_div_names
               1 File(s)      2,822,330 bytes
               0 Dir(s)   1,644,224,512 bytes free

C:\download>_
```
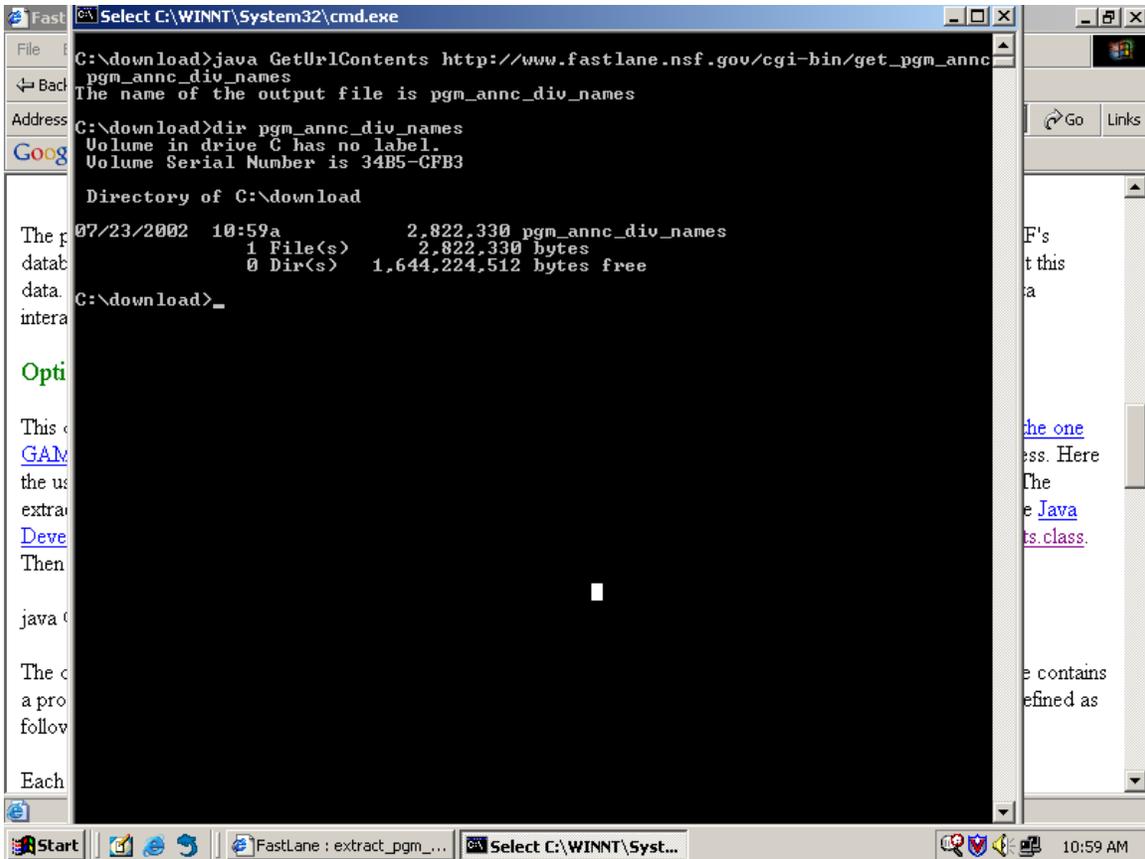

The output file that we named as "pgm_annc_div_names" contains multiple records. Viewed through WordPad on a Windows PC this is how it looks –

```
pgm_annc_div_names - WordPad                                              _ | 8 | X

Each line has 175 characters
The character position of the data items in each line is shown below-
1-10-----------Progam Announcement id Related to EDI BGN06
(i.e Characters 1 through 10 have the program announcement id ...)
12-111---------Program Announcement Description
113-122--------Effective day of this program announcement
124-133--------Expiry date of this program announcement
135-174--------Division name Related to EDI N902
