

Dear Don Clark

I am frustrated with the over-
amounts of things from China, Korea,
Mexico etc. I've tried finding things
like shoes for example, "made in USA".
I went through shoe outlets and other
stores. Finally I found a pair that were
made by Dr. Sholls. The box said "made
in USA". When I examined the shoe for
size, I saw written: "made in Poland".
Another time in Wal-mart, I looked for
a multimeter I needed. The one
left on the display had on its label:

"made in USA", with a Dayton Ohio
address. I looked inside for ~~batteries~~
batteries and found "made in Korea"
written on the wrapper.

I'm a person who works in "this
country" and depends on this country's
economy. I spend it here to help us
all for a healthy economic equilibrium.
With this in mind, I shop "USA only"
goods.

I urge you to vote against a
draft put out by the "~~Fed~~ federal trade
commission": to label goods even

partially made here as being, "made in
USA."

The main point is, that if it
wasn't made ~~made~~ here totally, it
wasn't, "made in the USA."

Sincerely

Dick Mayd
