

Office of Sec. of FTC:

Anne M Doyle

I write to comment on the proposed changes concerning the "made in the USA" label. I strongly object to the changes as I am one citizen who will only buy U.S.A. produced or any other country whose U.S.A imports are near their imports into my country.

For sixteen years I have studied the trade policies of my country and have concluded that both parties are guilty of strip-mining American jobs.

Many years ago I heard an Arab state that "Washington, D.C. was the whore-house of the world". At this time I was affronted by his statement, now I concur.

The old latin phrase "quid pro quo" is now replaced by "quid pro go".

The social havoc our policies have caused are measured by the ever-increasing numbers of our young citizens entering prisons.

GATT, NAFTA, WTO are disasters!

I ask to save the few things left for me to buy, please.
