

# **PRIME CONTRACTOR PARTNERSHIP PROGRAM**

## ***“Partnering with Industry to Support Acquisition Reform”***

The Navy's **Prime Contractor Partnership Program** was developed to support Department of Defense acquisition reform initiatives. This Program allows the Navy and Shipbuilders/Prime Contractors to share subcontractor performances data. The Program supplements both government and industry information systems without requiring additional funding or resources.

In addition to supporting acquisition reform initiatives, the objectives of the Prime Contractor Partnership include:

- **Improve material quality**
- **Enhance the source selection process**
- **Develop working relationships and partnerships with Prime Contractors and Shipbuilders**
- **Assist with determining need for additional quality assurance actions**

The Navy currently has past performance data exchange partnerships with:

- **General Dynamics Electric Boat Division**
- **Newport News Shipbuilding**
- **Bath Iron Works**
- **Boeing Corporation**
