

## **Product Data Reporting and Evaluation Program**

### *“Improving Product Quality, Services and Delivery”*

**PDREP** is an automated information system designed to track quality and delivery performance on material/ services procured by the Navy.

The **PDREP** system was developed in the mid 1980's after a GAO audit determined there was no centralized system to maintain quality data. Prior to **PDREP** each SYSCOM maintained its own database that did not allow sharing of information which could benefit the Navy.

**PDREP** is a Windows environment and easy to access. The system currently resides on a Sun 5000 using an ORACLE 7.2 relational database server.

**PDREP** collects data from all Naval Systems Commands and DLA on a daily basis. The following records are collected and maintained on the **PDREP** database:

- Contractor CAGE Information
- Debarment/Suspension
- Delivery Data
- DLA Contractor Alert List
- DLA Lab Tests
- GIDEP Alerts
- Material Inspection Records
- Product Quality Deficiency Reports
- Qualified Product List
- Special Quality Data
- Surveys
- Test Reports

The **PDREP** system can be accessed via the INTERNET. The system offers a wide selection of standard reports, management reports, and graphical output. A powerful Ad-hoc feature allows the design of unique reports. Whether deciding to whom a contract will be awarded, or deciding what contract quality requirements to invoke--**PDREP** can help!!

**PDREP** also provides information to the Navy's **Red/Yellow/Green** Program. This program provides quality and delivery classifications that are used in the source selection process.

**PDREP** is governed by the Office of the Assistant Secretary of the Navy. The Naval Sea Systems Command is the Functional Manager, and NAVSEALOGCENDET Portsmouth is the Deputy Functional Manager and the Automated Information System Manager.

The **PDREP** system may be accessed by downloading a User Access Form from [www.nslcptsmh.navsea.navy.mil](http://www.nslcptsmh.navsea.navy.mil) or contact our Help Desk and ask for a User Request Form.

**System requirements:**

Pentium or greater Internet Access  
50 MB disk space  
32 MB RAM

**Points of Contact:**

**DSN: 684-1690**

**Comm: (603)431-9460**

**FAX: (603)431-9464**
