

## *Detachment Portsmouth...*

# *“Providing innovative **Past Performance** evaluation technology”*

### **MISSION**

The mission of the Naval Sea Logistics Center Detachment Portsmouth (NAVSEALOGCENDET Portsmouth) is to analyze the quality of material and services provided to the Navy, assess the past performance of contractors supplying material and services, and to recommend actions which result in improved products and best value contract award decision.

### **VISION**

NAVSEALOGCENDET Portsmouth's vision is to provide innovative past performance evaluation technology that will provide the Navy best quality parts and service to assure fleet safety and reliability.

### **BACKGROUND**

NAVSEALOGCENDET Portsmouth is a full service organization under a Director who reports to the Commanding Officer of the Naval Sea Logistics Center in Mechanicsburg, PA. NAVSEALOGCENDET Portsmouth provides quality assurance technical guidance and support to Naval activities and maintains the Navy's Product Data Reporting and Evaluation Program (PDREP). The PDREP database contains quality as well as delivery past performance and collects all PQDRs (SF-368) for which the Navy has cognizance as well as Marine Corp PQDRs. This past performance and PQDR information is made available to the Navy and other agencies in a user friendly application.

### **FUNCTIONS**

**Administers/Manages** the Product Data Reporting and Evaluation Program (PDREP) including ongoing analysis of PDREP quality information to identify specific problem areas.

**Develops/Maintains/Manages** the Navy's past performance programs including:

- Red/Yellow/Green (RYG)
- Contractor Evaluation System (CES)
- Contractor Performance Assessment Reporting System (CPARS)
- Prime Contractor Partnership Program-
- Supplier Audit Program (SAP)

**Administers** Product Quality Deficiency Report (PQDR) Program for NAVSEA.

**Principal lead** for NAVSEA in the investigation of suspected or verified reports of product substitution fraud.

**Maintains** interface with GIDEP, QPL and other DoD material quality programs.

**Provides** Level 1/SubSafe Material Identification Code Verification tool.

**Provides** technical support and material data analyses for DLA and NAVSEA programs.  
**SYSTEM MANAGEMENT**

NAVSEALOGCENDET Portsmouth is the Automated Information System manager responsible for system programming, system maintenance (i.e., system backup, communication), use3r help line, and training. All programs are operated on a Sun 5000 Logistics Center Detachment Atlantic in Indian Head, Maryland.

NAVSEALOGCENDET Portsmouth is the Automated Information System manager responsible for system programming, system maintenance (i.e., system backup, communication), use3r help line, and training. All programs are operated on a Sun 5000 Logistics Center Detachment Atlantic in Indian Head, Maryland.

SYSCOMs/Activities are responsible for collecting and submitting contractor performance data for each system. Data can be added on-line, through a batch mode, or via hardcopy. Edit listings are provided to the submitting activities.

All programs can be accessed electronically. All programs allow a wide selection of standard reports, management reports, and graphical output. A powerful Ad-Hoc feature allows the personal design of unique reports.

NAVSEALOGCENDET Portsmouth is continually searching for new and efficient methods for compiling and implementing past performance records in order to provide innovative, user friendly, effective and reliable past performance management systems.

## **TRAINING**

Training for Product Data Reporting and Evaluation Program (PDREP), Red/Yellow/Green (RYG) and Contractor Performance Assessment Reporting System (CPARS) is offered monthly or upon request. Training location is NAVSWEALOGCENDET Portsmouth, or the activity site requested.

**PDREP** instruction involves hands on training for tracking quality and delivery performance for material/services procured by the Navy.

**RYG** instruction involves hands on training to aid in the reduction of risk receiving non-conforming products and late deliveries.

**CPARS** instruction provides hands on training for the web enabled Contractor Performance Assessment Reporting System

**PPAIS** is a web-enabled application that allows the retrieval of contractor past performance information.
