

REVENUE ASSURANCE SUNFLOWER CROP PROVISIONS

This is a pilot risk management program. This risk management tool will be reinsured under the authority provided by the Federal Crop Insurance Act as amended. If a conflict exists among the policy provisions, the order of priority is as follows: (1) the Special Provisions; (2) these Crop Provisions; and (3) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

CBOT - Chicago Board of Trade.

Fall harvest price - The price used to value production to count. The fall harvest price is the simple average of the final daily settlement prices in September for the CBOT October soybean oil futures contract divided by two, then subtract one. This price will be released on or before October 5.

Fall harvest price option - A coverage option that allows you to use the greater of the projected harvest price or the fall harvest price to determine your per-acre revenue guarantee. For basic, optional, and enterprise units, this option applies to all insurable acres of sunflowers in the county. For the whole-farm unit, this option will apply to all insurable acres of the applicable crops in the county. This option must be selected by the sales closing date and is continuous unless canceled by the crop sales closing date.

Harvest - Combining or threshing the sunflowers for seed.

Local market price - The cash price per pound for oil type sunflower seed grading U.S. No. 2 or better, or non-oil type sunflower seed with a test weight of at least 22 pounds per bushel and less than 5 percent kernel damage offered by buyers in the area in which you normally market sunflower seed. The local market price for oil type sunflower seed will reflect the maximum limits of quality deficiencies allowable for the U.S. No. 2 grade of sunflower seed. Factors not associated with grading of sunflower seed under the Official United States Standards for Grain including, but not limited to, oil or moisture content will not be considered.

Planted acreage - In addition to the definition contained in the Basic Provisions, sunflowers must initially be planted in rows far enough apart to permit mechanical cultivation, unless otherwise provided by the Special Provisions.

Prevented planting guarantee - The prevented planting guarantee for such acreage will be the selected percentage of the per-acre revenue guarantee for timely planted acres.

Projected harvest price - The price used to determine expected per-acre revenue. The projected harvest price is the simple average of the final daily settlement prices in February for the CBOT October soybean oil futures contract divided by two, then subtract one. The projected harvest price will be released on or before March 5 of the current crop year.

2. Contract Changes

In accordance with section 5 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

3. Cancellation and Termination Dates

In accordance with section 3 of the Basic Provisions, the cancellation and termination dates are March 15.

4. Annual Premium

In addition to the provision of section 8 of the Basic Provisions, your per-acre premium on a unit is determined

using the premium calculator. Your per-acre premiums will differ by crop and unit structure.

(a) Basic unit: The annual premium for a basic unit equals the per-acre premium, times the number of insured acres in the unit, times your share.

(b) Optional unit: The annual premium for an optional unit equals the per-acre premium times an optional unit surcharge factor, times the number of insured acres in the optional unit, times your share. The optional surcharge factor is 1.10.

(c) Enterprise unit: The per-acre premium decreases as the number of legally defined sections on which you have insured acreage increases up to a maximum of 10 sections. The annual premium for an enterprise unit equals the per-acre premium, times the number of insured acres in the unit, times your share.

(d) Whole-farm unit: The annual premium for a whole-farm unit equals the per-acre premium, times the number of insured acres in the unit, times your share. The insured per-acre premium decreases as the number of legally defined sections on which you have insured acreage increases up to a maximum of 10 sections. The per-acre premium also depends on the proportion of insured crop acres on the unit. For example, if the unit contains sunflowers, soybeans, and wheat, the per-acre premium will depend on the ratio of sunflower to soybean insured acres, the ratio of sunflower to wheat insured acres, and the ratio of soybean to wheat insured acres.

5. Insured Crop

In accordance with section 9 of the Basic Provisions, the crop insured will be all the oil and non-oil type sunflowers in the county for which a premium rate is provided by the premium calculator:

(a) In which you have a share;

(b) That is planted for harvest as sunflower seed; and

(c) That is not (unless allowed by the Special Provisions):
(1) Interplanted with another crop; or
(2) Planted into an established grass or legume.

6. Insurable Acreage

In addition to the provisions of section 10 of the Basic Provisions:

(a) We will not insure any acreage that does not meet the rotation requirements contained in the Special Provisions; and

(b) Any acreage of the insured crop damaged before the final planting date, to the extent that a majority of producers in the area would not normally further care for the crop, must be replanted unless we agree that it is not practical to replant.

7. Insurance Period

In accordance with the provisions of section 12 of the Basic Provisions, the calendar date for the end of the insurance period is November 30, immediately following planting.

8. Causes of Loss

In accordance with the provisions of section 13 of the Basic Provisions, insurance is provided only against the following causes of loss which occur within the insurance period that results in an unavoidable loss of revenue:

- (a) Adverse weather conditions;
- (b) Fire;
- (c) Insects, but not damage due to insufficient or improper application of pest control measures;
- (d) Plant disease, but not damage due to insufficient or improper application of disease control measures;
- (e) Wildlife;
- (f) Earthquake;
- (g) Volcanic eruption;
- (h) Failure of the irrigation water supply if due to a cause of loss contained in sections 8(a) through (g) occurring within the insurance period; or
- (i) A decline in the fall harvest price below the projected harvest price.

9. Replanting Payment

- (a) In accordance with section 14 of the Basic Provisions:
 - (1) A replanting payment for sunflowers is allowed if the sunflowers are damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the per-acre revenue guarantee for the acreage and it is practical to replant. The projected harvest price is used to determine if 90 percent of the per-acre revenue guarantee can be achieved.
 - (2) The maximum amount of the replanting payment per acre will be your insured share multiplied by the lesser of 20 percent of the per-acre revenue guarantee based on the projected harvest price or an amount equal to 175 pounds of seed multiplied by the projected harvest price.
- (b) When sunflowers are replanted using a practice that is uninsurable as an original planting, the per-acre revenue guarantee based on the projected harvest price, will be reduced by the amount of the replanting payment which is attributable to your share. The premium amount will not be reduced.
- (c) The per-acre revenue guarantee and premium for acreage replanted to a different insurable type will be based on the replanted type and will be calculated in accordance with sections 4 and 8 of the Basic Provisions and section 4 of these Crop Provisions.

10. Duties In The Event of Damage or Loss

In accordance with your duties under section 15 of the Basic Provisions, if you initially discover damage to the sunflowers within 15 days of, or during harvest, you must leave representative samples of the unharvested sunflowers for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in the unit, and must not be harvested or destroyed until the earlier of our inspection or 15 days after harvest of the balance of the unit is completed.

11. Settlement of Claim

- (a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:
 - (1) For any optional units, we will combine all optional units for which such production records were not

provided; or

- (2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.
- (b) In the event of loss or damage covered by this policy, we will settle your claim using the following procedures:
 - (1) Basic and Optional units: We will settle your claim on each basic or optional unit by:
 - (i) Multiplying the per-acre revenue guarantee by the number of insured acres in the unit;
 - (ii) Multiplying the fall harvest price by the production to count for each unit (see sections 11(c) through (e));
 - (iii) Subtracting the result of section 11(b)(1)(ii) from the result of section 11(b)(1)(i); and
 - (iv) Multiplying the results of section 11(b)(2)(iii) by your share.

If the result of section 11(b)(1)(iv) is greater than zero, an indemnity equal to that result will be paid to you. If the result of section 11(b)(1)(iv) is less than or equal to zero, no indemnity will be paid.

- (2) Enterprise units: We will settle your claim on an enterprise unit by:
 - (i) Multiplying the per-acre revenue guarantee by the number of insured acres in the enterprise unit;
 - (ii) Multiplying the fall harvest price by the production to count for the enterprise unit;
 - (iii) Subtracting the result of section 11(b)(2)(ii) from the result of section 11(b)(2)(i); and
 - (iv) Multiplying the result in section 11(b)(2)(iii) by your share.

If the result of section 11(b)(2)(iv) is greater than zero, an indemnity equal to that result will be paid to you. If the result is less than or equal to zero, no indemnity will be paid.

- (3) Whole-farm units: We will settle your claim on a whole-farm unit by:
 - (i) Multiplying the per-acre revenue guarantee for each crop by the number of insured acres planted to each crop;
 - (ii) Totaling the results of section 11(b)(3)(i);
 - (iii) Multiplying the fall harvest price for each crop by the production to count for each crop;
 - (iv) Totaling the results of section 11(b)(3)(iii);
 - (v) Subtracting the result of section 11(b)(3)(iv) from the result of section 11(b)(3)(ii); and
 - (vi) Multiplying the result of section 11(b)(3)(v) by your share.

If the result of section 11(b)(2)(vi) is greater than zero, an indemnity equal to that result will be paid to you. If the result is less than or equal to zero, no indemnity will be paid.

- (c) The total production to count (in pounds) from all insurable acreage on the unit will include:
 - (1) All appraised production as follows:
 - (i) Not less than the per-acre revenue guarantee will be used for such acreage:
 - (A) That is abandoned;
 - (B) That is put to another use without our

- consent;
 - (C) That is damaged solely by uninsured causes; or
 - (D) For which you fail to provide acceptable production records;
 - (ii) Production lost due to uninsured causes;
 - (iii) Unharvested production (mature unharvested production may be adjusted for quality deficiencies and excess moisture in accordance with section 11(d)); and
 - (iv) Potential production on insured acreage you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
 - (A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
 - (B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
 - (2) All harvested production from the insurable acreage.
 - (d) Mature sunflower seed may be adjusted for excess moisture and quality deficiencies. If moisture adjustment is applicable, it will be made prior to any adjustment for quality.
 - (1) Production will be reduced by 0.12 percent for each 0.1 percentage point of moisture in excess of 10 percent. We may obtain samples of the production to determine the moisture content.
 - (2) Production will be eligible for quality adjustment if:
 - (i) Deficiencies in quality result in
 - (A) Oil type sunflower seed not meeting the grade requirements for U.S. No. 2 (grades U.S. sample grade) because of test weight, kernel damage (excluding heat damage), or a musty, sour or commercially objectionable foreign odor; or
 - (B) Non-oil type sunflower seed having a test weight below 22 pounds per bushel or kernel damage (excluding heat damage) in excess of five percent (5%) or a musty, sour or commercially objectionable foreign odor; or
 - (ii) Substances or conditions are present that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.
 - (3) Quality will be a factor in determining your loss only if:
 - (i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions and which occurs within the insurance period;
 - (ii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us; and
 - (iii) The samples are analyzed by a grader licensed to grade sunflower seed under the authority of the United States Grain Standards Act or the United States Warehouse Act with regard to deficiencies in quality, or by a laboratory approved by us with regard to substances or conditions injurious to human or animal health. Test weight for quality adjustment purposes may be determined by our loss adjuster.
 - (4) Sunflower production eligible for quality adjustment, as specified in sections 11(d)(2) and (3), will be reduced by the quality adjustment factor contained in the Special Provisions.
 - e. Any production harvested from plants growing in the sunflowers may be counted as sunflower seed on a weight basis.
- 12. Prevented Planting**
- Your prevented planting coverage will be 60 percent of your per-acre revenue guarantee for timely planted acreage. You may increase your prevented planting coverage to a level specified in the actuarial documents by paying an additional premium.
