SAS CD Sets Available to CDC Grantees

1. SAS Version 8.2 Standard Products (8 CDs):

Base SAS	SAS/ETS
SAS/ASSIST	SAS/OR
SAS/GRAPH	SAS/QC
SAS/TOOLKIT	SAS/GIS
SAS/CONNECT	SAS/IntrNet
SAS/SHARE	SAS/MDDB
SAS/ACCESS - all	SAS/FSP
SAS/IML	SAS/AF
SAS/STAT	SAS/EIS
SAS/INSIGHT	SAS/Online Tutor
SAS Data Quality-Cleanse	Integration Technologies
SAS/LAB	

2. JMP – 4.0.5 (1 CD)
3. STATVIEW – 5.0.1 (1 CD)
4. Enterprise Reporter 2.5; Service Pack 2   (2 CDs)
5. Enterprise Guide – 1.3 (1 CD)
6. SAS/Warehouse Administrator – 2.2 (4 CDs)
7. SAS Scalable Performance Data Server – 3.0 (1 CD)
8. Integration Technologies (1 CD)
9 SAS/GIS Census Tract Maps - for SAS/GIS users only (1 CD)
10 SAS/AppDev Studio – 2.0; 2.0.1 Update (2 CDs)
11 Blue Fusion Base and Match – 4.0
12 Blue Fusion Verify – 4.0
13 DataFlux Power Base – 4.2
14 DataFlux Power Match – 4.2
15 DataFlux Power Verify – 4.2
16 SAS Version 8.2 Standards Products (see #1 above) – Server Version

SAS Products Glossary

For additional information about each product, see the SAS web site:
(http://www.sas.com/products/index.html)

JMP - "the Statistical Discovery Software, dynamically links statistics with graphics to interactively explore, understand, and visualize data."

StatView - "packs data management, statistical analyses, and presentation tools into a single intuitive and coherent desktop software package that anyone can use."

Enterprise Report - "Enterprise Reporter, completes the process of turning data into useful information by enabling the user to see, analyze and present information customized to their specific reporting needs."

Enterprise Guide - "Business analysts and SAS programmers can tap the full power of the SAS system using an easy to use, task based, Microsoft familiar graphical user interface. This Windows client connects to any Version 8 SAS System Server and allows users to access any data types supported by the SAS System, utilize the execution power of that machine to run any SAS processes, and return professional reports and graphics to your PC."

SAS/Warehouse Administrator - "is designed for the IT professional responsible for creating and managing data warehouse/data mart processes. SAS/Warehouse Administrator is a customizable solution that offers a single point of control, making it easier to respond to the ever-changing needs of the business community."

Scalable Performance Data Server - "By utilizing the latest parallel processing methods and data server capabilities, the Scalable Performance Data Server delivers a fully integrated and seamless way to access large volumes of data and serves large numbers of concurrent users. Optimized as a data store for the SAS system, it enables extremely efficient data access for hundreds of users across multiple processors"

Integration Technologies - "software lays a foundation for standardized communications and effective information distribution. It opens new doors by enabling SAS applications to integrate seamlessly with other enterprise applications and systems and by providing a framework for proactive information delivery."

AppDev Studio - "provides everything you need to create Java client applications and applets; Java server applications (servlets, JSP and EJB); CGI/HTML applications; Active Server Pages applications and traditional full-client applications"

DataFlux dfPower Studio - "brings data quality and data integration capabilities to your desktop. dfPower Studio is customizable, easy to use and can be utilized by any user in any department. The solution provides data management functionality for identifying and fixing data inconsistencies, matching and integrating items within and across data sources, and identifying and correcting duplicate data in a data source. dfPower Studio also provides data enrichment functionality to enhance your business data with valuable geographic and demographic data."

DataFlux Blue Fusion SDK - "the underlying software developer kit that enables system developers to incorporate the powerful data quality components of DataFlux into their own applications. Blue Fusion SDK is the foundation of which all of the other DataFlux products are

built. Blue Fusion SDK is a set of libraries, which for Windows comes packaged as a DLL callable from C/C++ or as a COM."
