Conversation: browser toolbars
Subject: browser toolbars

To Whom It May Concern:

I whole heartily agree that there should be laws disallowing company that reconfigure web browser indiscriminately without the users knowledge or permission. No one should have the right to download and install components on my computer and then reconfigure my software especially if it is for the purpose of Spyware to monitor my computer use. Thank you for supporting the end-user.

Sincerely,
David Brossart
