Please do what you can to stop spyware, it is a shame to buy a computer pay for online service - then someone you have never met grabs access to your files and information, and often causes problems in the operation of my comuter.

I assume what I do online and at home is MT business - no one elses, not even the governments. I do nothing a 5 year old couldn't sit and watch me dom but I have gotten sex emails and favorites/bookmarks for porn sites - I don't do that stuff !! how did they do that? Stop them please.
