Subject: Spyware Workshop - Comment, P044509

I don't like people gathering private information about me, that I don't know they are gathering. Spyware/adware are an invasion of our privacy and do not have any useful purpose. Cookies that are used to facilitate using the website you are on without gathering other information is acceptable as they fill a need. Cookies used to gather information for ad/spy purposes are an invasion of our privacy. There are limits that many companies are exceeding and they should be made accountable for their actions, and responsibilities. And yes, they are responsible for the protection of the privacy of the people that they do business with.
